1. About This Document

The sequence for rest of the document is as follows:

First of all, a brief overview of starting a web hosting business. Then the complications and complexities of divulging into this business. After that presenting the right Control Panel Product (i.e. MachPanel latest release) as bearer of torch in the dark (A brief introduction to the product with complete automation solution). The impressive features that this new release possesses along with the vast offering of functionality. In the end the conclusion.

2. Introduction

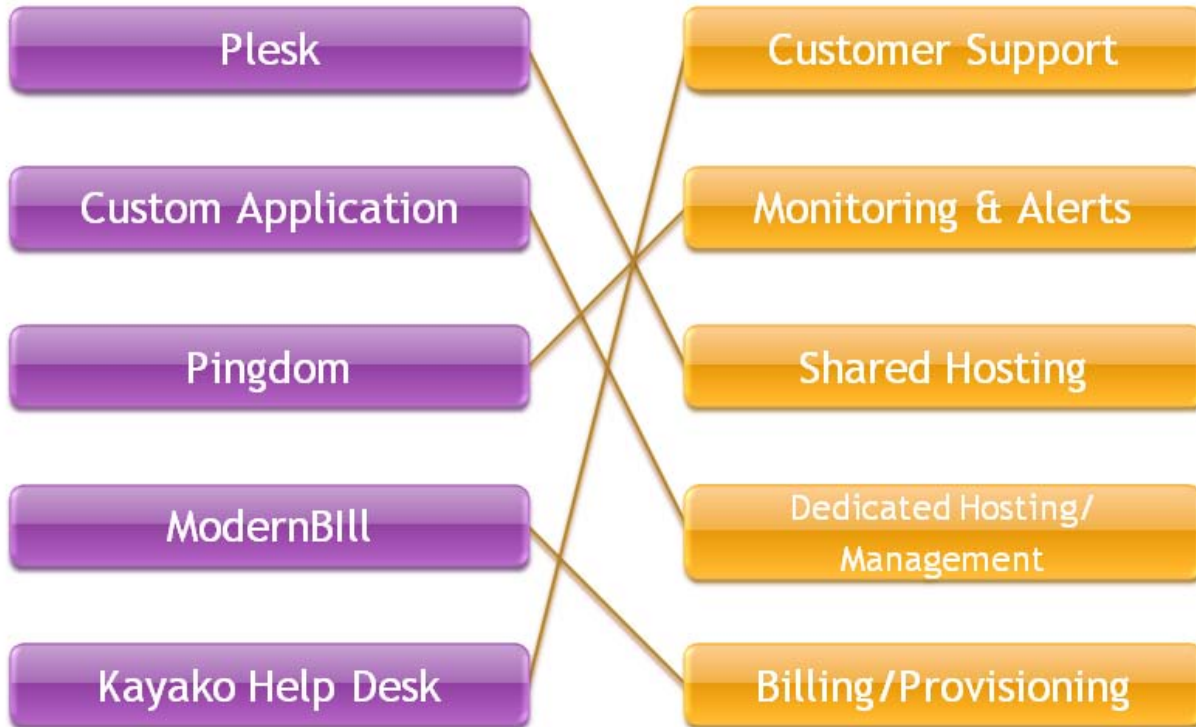

Most of web hosting providers use software from different vendors to manage their web hosting business environment and operations. Just to name a few are:

1. **Plesk** as Shared Web Hosting Panel – Vendor Parallels
2. **Custom Application** as Dedicated Hosting Panel
3. **Custom Application** as Domain Registrations and Management
4. **ModernBill** as Billing & Automated Provisioning Panel – Vendor ModernGigaByte
5. **Kayako Help Desk** as Customer Support System – Vendor Kayako
6. **Pingdom** as Servers Monitoring & Alerts Service – Vendor Pingdom

Control Panel	As	Vendor
Plesk	Share Web Hosting	Parallels
Custom Application	Dedicated Hosting	Parallels
Custom Application	Domain Registration & Management	Parallels
ModernBill	Billing & Automated Provisioning	ModernGigaByte
Kayako Help Desk	Customer Support System	Kayako
Pingdom	Servers Monitoring & Alert Service	Pingdom

2.1. Imagine the Chaos

Just imagine the chaos created when dealing with so many vendors and different applications! There are so many overheads that include:

- No central login for management & staff
- Difficult on staff
- So many different logins and interfaces, frustrating for customer
- So many applications to keep eye and update
- So many security risks arising from flawed applications
- So many different licensing
- High cost of running the overall business
- Less profitable

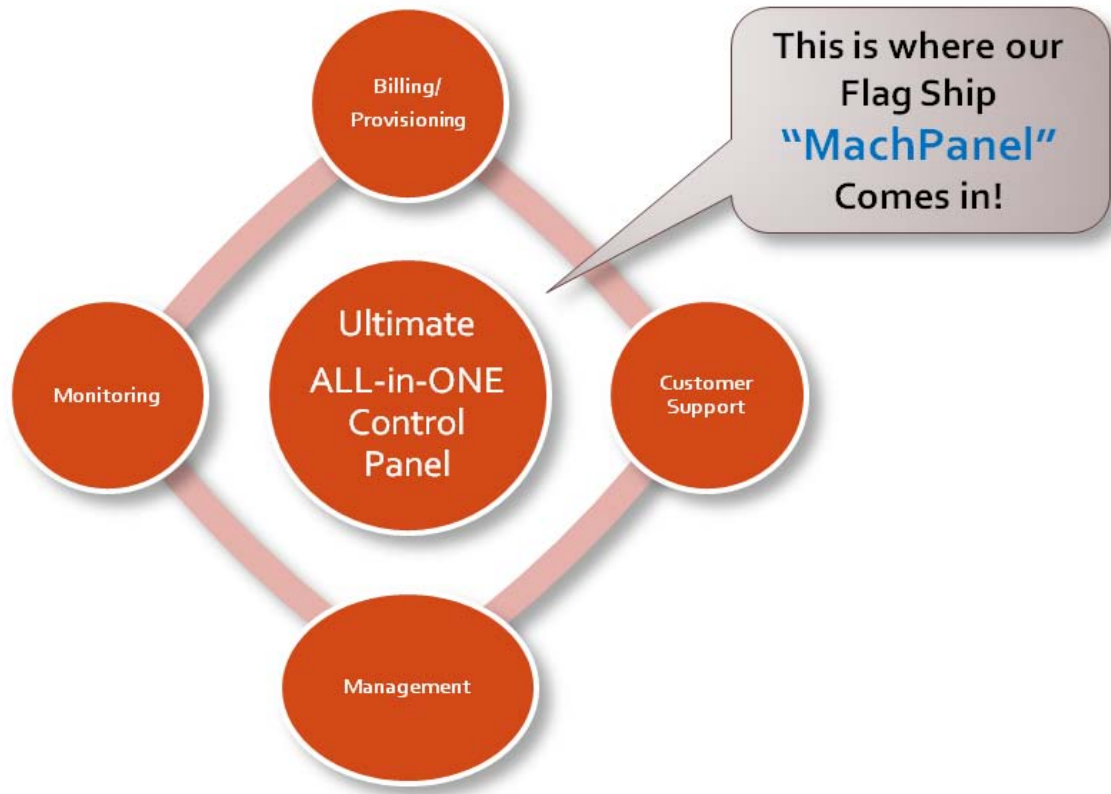

2.2. Upcoming Disaster

Now, competition has a new face. Who might compete? Add to this list:

1. **Amazon** with Cloud computing; over 300,000 developers (amazoogle Soft)
2. **Google** is driving into online stuff. Moving more and more into the hosting space.
3. **Microsoft** has started it already with online services (Office Live) business stuff etc.

2.3. Solution to Chaos

This is where our Flag Ship MachPanel comes for the rescue and serves as the solution to this disorder Following diagram shows how the chaotic situation is dealt through MachPanel.

3. What is MachPanel?
