

MachPanel 5.1 BUILD 10 Release Notes (June 30, 2014)

Contents

1. Important Prerequisites
2. Upgrade Instructions
3. New Features/Improvements
4. Resolved/Fixed Issues
5. Known Issue

Important Prerequisites

1. MachPanel Control Server 5.0.11
2. MachPanel Remote Server 5.0.11

Note: ADSync enhancements done in ADSync v2 are compatible only with MachPanel 5.1.10. So, if you update MachPanel, you have to update the ADSync tool and vice versa. Please review following KB article to update ADSync Utility to v2.0:

<http://kb.machsol.com/Knowledgebase/Article/53432>

Upgrade Instructions

Please follow the steps given below in sequence and execute instructions in the KB articles to complete the update:

1. [Update to Latest MachPanel](#)
2. [Update to Latest MachPanel Remote Server](#)

Major Enhancements

MachPanel 5.1 BUILD 10 Release Notes (June 30, 2014)

1. Ability to move subscriptions between Customers: Please view details on the following link: <http://kb.machsol.com/Knowledgebase/Article/53435>
2. WHMCS Integration
3. MS SQL 2012\2014 support in webhosting
4. Journaling mailbox in Exchange
5. Exchange DAG Issues handled
6. Webhosting - Usage report added
7. Lync detailed API made public
8. ADSync Config Studio be configured to auto map newly created AD users and sync them back to the hosted environment
9. ADSync tool to handle multiple OUs on local AD
10. Defining default timezone in Customer/reseller add/edit form.

Note: All providers/resellers need to update Timezone using Company Settings interface. Same timezone will be selected when creating new customer.

Known Issues

After updating to 5.1 and trying to get the call reports you will get this error:

Procedure or function SPR_GetOrganizationsCallRecords has too many arguments specified.

With the additional Conference Call reports, it will give this error:

Could not find stored procedure 'SPR_GetOrganizationsConferenceRecords'.

Resolution to Known Issue:

Please request for zip file containing fix to call report issue [by contacting MachSol Support](#). You will need to update Lync Call Report Configuration by applying the configuration and re-applying SQL Script in given Zip file.
