MachPanel Build v5.2.26 Release Notes

Contents

1. Important Prerequisites
2. Upgrade Instructions
3. Improvements\New Features
4. Resolved\Fixed Issues
5. Known Issues

Important Prerequisites

1. MachPanel Control Server 5.2.25
2. MachPanel Remote Server 5.2.25

Update Note: The update is applied via an automatic updater by following the detailed instructions in links below. During the update process an older build will get updated to latest build in a stepwise process and any missing updates will be automatically installed. Just be sure to have a valid FULL Database Backup and backup of Installation files for MachPanel Control and Remote Servers.

Upgrade Instructions

Please follow the steps given below in sequence and execute instructions in the KB articles to complete the update:

1. [Update to Latest MachPanel](#)
2. [Update to Latest MachPanel Remote Server](#)

Important Note: Due to inclusion of new enhanced menu java scripts some interfaces may not work correctly due to cached content in browser cache in IE 10\11, Chrome, Firefox. Press **CTRL+F5** and refresh the browser or clear browser cache and perform IISRESET on MachPanel Control Server after the update to fix such occurrences.

Major Enhancements

Secure Automated Login to Control Panel from WHMCS:

Auto login functionality of MachPanel for WHMCS login links is enhanced with encryption of data being transmitted to the machpanel login page. To see the detail of the enhancement

MachPanel Build v5.2.26 Release Notes

please refer to the '**Secure Automated Login to Control Panel from WHMCS**' section in WHMCS Integration guide (**WHMCS Integration.docx)**.

GUIDE:WHMCS Integration and configuration with MachPanel-v5.2.26
