2. Upgrade Instructions
3. Improvements\New Features
4. Resolved\Fixed Issues
5. Known Issues

1. Important Prerequisites

1. MachPanel Control Server 5.6.30 or earlier
2. MachPanel Remote Server 5.6.30 or earlier

2. Upgrade Instructions

Please follow the steps given below in sequence and execute instructions in the KB articles to complete the update:

1. [Update to Latest MachPanel](#)
2. [Update to Latest MachPanel Remote Server](#)

Important Note:

- **Note 1: WHMCS Module needs to be updated:**

If you update MachPanel to Build v5.6.44, it will become mandatory to update WHMCS Module. Please download the zip package from link below and update all necessary files by making changes as advised in (WHMCS Integration.docx) document within the zip and then replace them over the existing ones under MachPanel Installation directory.

http://www.machsol.com/updates/5644/WHMCS_Integration_Pack_v4_updated_18July2017.zip

- **Note 2: Manual Update of all remote servers required once:**

Communication between Control and Remote server is further secured using encryption. Due to this change a manual

MachPanel Build v5.6.44 Release Notes (July 25th, 2017)

update of every remote server is required once. Please follow instructions given on KB link below to perform manual update under section [**B-To manually update MachPanel Remote Server:**]:

<http://kb.machsol.com/Knowledgebase/Article/50209>

- **Note 3: RSAT required on Exchange Mailbox Servers:**

When changing Access Permissions on a Mailbox. It appears to go through. However if you click away and then click back to the permissions nothing has gone through. This is because of missing RSAT Feature on mailbox server. Please follow details on KB link below for more details:
