MachPanel v.7 Storefront Integration with Provider's Website

1 Introduction

MachPanel integration with your (Provider's) website allows your clients to have one control panel login once they have ordered products. They would buy say a domain and hosting package via MachPanel, set up payment and then are given a login to their control panel where it's all managed. Most of all Providers do not have to worry about the look and feel part because MachPanel supports complete customization (themes, CSS) in this respect. It can easily customize the look and feel of the order form according to Provider's taste and need. Please see Customizing Order Form for details.

Create a new order form as shown below then click **Launch Store**.

A screenshot of the MachPanel control panel interface. The breadcrumb trail at the top reads 'Home > System Configuration > Store Configuration'. The main section is titled 'Store Configuration' and has a sub-section 'Order Forms'. Under 'Order Forms', there is an 'Operations' section with a 'New Order Form' button, which is highlighted with a red arrow. Below that is a 'Settings' section with a checkbox for 'Enable email verification for new customer registration' (checked) and a 'Save' button. At the bottom, there is a table with columns: 'ID #', 'Order Form Name #', 'Domain Allowed', and 'Options'. The table contains one row with ID # 22, Order Form Name # Demo Store Form, Domain Allowed No, and Options. The 'Options' column has three buttons: 'Launch Store', 'Edit', and 'Delete'. A red arrow points to the 'Launch Store' button with the text 'Launch/Edit existing store' above it.

2 MachPanel Storefront

After the client selects the desired product from Provider's products listing and categories (on the website) by clicking on let's say "Buy" or "Purchase" button. He/she will be directed to the MachPanel's Storefront order form which is shown as under.

Order Summary

Items (0):	USD 0.00
Estimated Tax:	USD 0.00
Total:	USD 0.00

2.1 Store Front User Interface

MachPanel Store Front interface comprises of:

1. Login and Register toolbar
2. Products Toolbar
3. Header
4. Footer
5. Products Section

2.1.1 Login and Register toolbar

It shows the title of the store. Your end customers can register and login to their accounts. It provides and displays options for selecting a Locale and Language.

2.1.2 Products Toolbar

This toolbar provides what type of product are available to the end user. It is used to select product categories namely:

1. Domain Registration
2. Shared Hosting
3. Misc Hosting
4. Exchange Hosting
5. Skype for Business Hosting
6. SharePoint Hosting
7. Dynamics CRM Hosting
8. VPS Hosting
9. Microsoft CSP Hosting
10. Work Folders Hosting
11. RDS Hosting

2.1.3 Header

This will display the header of your order form.

2.1.4 Footer

This will display the footer of your order form.

2.1.5 Products Section

In this section you can see all the service plan offering for a particular / selected product which shows the details of the plans available for selling along with their prices.

The screenshot displays the 'Cloud Host Store' interface. At the top, there is a navigation bar with 'Language: English', 'Locale: English', and a 'Login' button. Below the navigation bar, there are four numbered steps (1, 2, 3, 4) indicating the current step in the process. The main content area is titled 'Microsoft Exchange Email Hosting' and includes a 'Back to Home' link. Below the title, there is a description: 'The most powerful and reliable email hosting packages made just for you. Choose from our most popular email hosting plans below.' The main content area contains two product cards. The first card is for '2 Org. 2 Mbx.' with a 'Monthly' billing cycle, 'Setup: USD 0.00', and 'Price: USD 0.00'. The second card is for 'Exchange 2019 Unlimited Enterprise Plus SPLA' with a 'Weekly' billing cycle, 'Setup: USD 0.00', and 'Price: USD 0.00'. Both cards have a 'Purchase Now' button. To the right of the product cards, there is an 'Order Summary' section with a table:

Order Summary	
Items (0):	USD 0.00
Estimated Tax:	USD 0.00
Total:	USD 0.00

- **Service Plan Name:** This shows/Display the name of products /Plans available.
- **Billing Cycle:** The billing cycle is shown as Annual, Monthly, and Weekly etc.
- **Setup Price/Price:** The shows the setup price/price of the Product.
- **Purchase Now:** Click this button to purchase your desired product.

3 Storefront Integration

MachPanel has the option to enable a panel login link for the client to take your clients from their billing account directly to their panel account. The system works through sending HTML parameters (aka.variables) to the purchase routine to initiate a sale, whether they are sent by a HTML submission form or a direct purchase link.

Integration involves accessing these variables directly. Certain steps can be skipped based upon your requirements. This can be accomplished by creating direct links to the cart by copying them and following Storefront variables will be required for successful integration.

Storefront variables and their description are as under:

Variable Name	Description
OFID	This variable relates to order form id
PDID	This variable relates to Payment group id
PType	This variable corresponds to the package type Possible values are: 1=Shared Hosting 2=Misc. Product 13=Software Product 14=CRM Hosting Product 5=Dedicated Server Hosting 15=AddOn Product 16=Microsoft Exchange 8=SSL Products 10=Domain Name Products 17=Microsoft SharePoint 18=Microsoft Office Communication Server 19=VPS Hosting
Type	This variable relates to the type of domain order. In case of transfer order Type is "Transfer"
Domain	Domain name variable to register or transfer with Top Level Domain (TLD) e.g. hostbreak.com (Meant for single domain order only)
PackId	Variable describing the Package Id to be purchased. (Package ids are separated by commas ",")

Cycle	<p>Relates to the Billing cycle or duration. (Comma "," separated package ids correspond to selected packages)</p> <p>Possible values are:</p> <p>1=Weekly, 2= 2 Weeks, 3=3 Weeks, 4=Monthly, 5=2 Months, 6=Quarterly, 7=Bi-Annual, 8=Annual, 9=2 Years, 10=3 Years, 11=4 Years, 12=5 Years, 13=6 Years, 14=7 Years, 15=8 Years, 16=9 Years, 17=10 Years, 18=Once</p>
-------	--

4 Examples

Storefront variables work by sending the customer from your website to the MachPanel Storefront with order ID. By setting the Storefront variables directly, you can easily skip unnecessary steps and point the desired page.

4.1 Shared Hosting Example

Let's consider the case if:

You want to direct your client who has opted for Shared hosting (Ptype=1) package with Order form (OFID =24), Payment Group ID (PGID=1) with monthly payment cycles (Cycle=4) and packages of (Packid=169,183). The corresponding Url will look like this:

<http://www.providerwebsite.com:8080/Store/Products.aspx?Ptype=1&OFID=24&PGID=1&Cycle=4&PackId=169,183>

4.2 Domain Registration

Now consider if:

You want to direct your client who has opted for Domain ownership (Ptype=10) with Order form (OFID=4). Client wants to transfer (Type=transfer) the domain (www.clientdomain.info) as well and he wants the billing to be done annually (Cycle=8). The corresponding Url will look like this:

<http://www.providerwebsite.com/Store/Products.aspx?Ptype=10&OFID=4&Type=transfer&Domain=www.clientdomain.info&Cycle=8&Checked=true> when transfer domain is available.

4.3 Reseller Hosting

Now consider if: You want to direct your client who has opted for Reseller Hosting (Ptype=2) with Order form (OFID=1) with two packages namely, Sample Reseller and Test Reseller (PackId=178,180) with monthly and 3Weekly billing respectively for each package (Cycle= 4,3). The corresponding Url will look like this:

<http://www.providerwebsite.com:8080/Store/Products.aspx?Ptype=2&OFID=1&Cycle=4,3&PackId=178,180>

Similar approach can be followed for other options/packages as well.

5 Customizing Order Form

It is very easy to customize look & feel of your order forms by customizing the store template in your/Template directory. Follow the instructions below:

- Go to path: **Home > System Configuration > Store Configuration.**
- Click **Edit** in front of Order Form

A screenshot of the MACHSOL Store Configuration interface. The page is titled "Configurations" and contains several settings for the store form. The settings are as follows:

Configuration	Value	Options
* Order Form Name:	Demo Store Form	
* Payment Groups:	US Dollar, Euro, Ruble, IDR	
* Store title:	Cloud Host Store	
* Pay by Cheque Allowed :	Yes	▼
* Pay by Bank Draft Allowed :	Yes	▼
* Pay by Invoice Allowed:	Yes	▼
Locale	English	▼ <input type="checkbox"/> Hide from Store
Language:	English	▼ <input type="checkbox"/> Hide from Store
* Continue Shopping URL:	https://supportpanel.machsol.com/	
* Terms URL:	https://supportpanel.machsol.com/	Example: http://domain.com/terms.htm <input type="button" value="Remove"/>

Example: Support Policy

- Check option for **Header** and **Footer** as shown below:

[Add More Terms](#)

Header: Show Header

Font: Verdana Size: 2 (10 pt)

B *I* U ~~X~~ X₂

Cloud Hosting Store

[Design mode](#) [HTML text](#)

Footer: Show Footer

Font: Verdana Size: 2 (10 pt)

B *I* U ~~X~~ X₂

[Design mode](#) [HTML text](#)

Sub Reseller:

- After creating an Order Form, you can also customize the Text for your store.

[Set as Home Page](#)

Store Configuration
