New Features and Notable Changes

Major Change

eJadSPM System

- Improved: Interfaces greatly improved, new Icons added to interfaces.
- Improved: Customer control center navigation menu is greatly improved.

New Features

eJadSPM System

- Feature added: Private label support. To configure private label, go to **System Configuration >> Company Profile >> Personalization**. Private label license is required to activate this feature.
- Feature added: New Edit Resources button to the Resources tab inside Subscription Management. The Edit Resource button allows modifying the service plan resources at subscription level.
- Feature added: Add-on management added to Service Plans. You can add system managed add-ons and attach them to service plan. The system managed add-ons are provisioned automatically.
- Feature added: Wireless devices support.
- Feature added: Generate Invoice for subscription. The provider and customer may generate renewal invoice any time.
- Feature added: Delete button added to Client detail interface.
- Feature added: Search by Company name now possible.
- Feature added: New "Easy Shop" option now available in Customer control center (CCC). This option allow customer to order additional services with ease.

eJadSPM 2.2 Release Notes (May 22, 2008)

- Feature added: Plesk 8.3 Linux now supported.
- Feature added: Chinese and other language characters now supported.

Hosted Exchange Extension (HEE)

- Feature added: Domain username now displayed and can be modified, same as exchange alias, eases ActiveSync configuration and administration.
- Feature added: Provider settings now linked with Hosted Exchange Server Groups. This will make it possible to control multiple AD Domains and exchange servers independently.
- Feature added: Each Exchange server group will now have its own Default Reseller LDAP.
- Feature added: Chinese and other language characters supported in Contacts, Distribution Lists and Mailboxes Display names.
- Feature added: All resources of an Exchange subscription can be viewed and modified now at the Exchange subscription's page under Resources Tab
- Feature Added: Several Managed add-ons for Hosted Exchange added, including Mailboxes, Organizations, Contacts and Distribution Lists. Add-on may be purchased by customer through the new Easy Shop option in the CCC.

Resolved Issues

Hosted Exchange Extension (HEE)

- Fixed: Exchange accounts listing paging.
- Fixed: Distribution list members paging.
- Fixed: Mail flow settings showing incorrect forwarding information.
- Fixed: Mailbox quota showing wrong values.
- Fixed: Change password at next logon was enabled for new mailbox.
- Fixed: Recipients with duplicate display names could not be added within one organization.
- Fixed: Blank tabs issue in mailbox and contact details.
- Fixed: OAB & GAL from organizations were visible in OWA to other OWA accounts. Standalone Exchange Control panel now creates appropriate security group and GALs for each organization.
- Fixed: "Not found on domain controller XYZ.Domain.com" Error at several standalone exchange server API calls.
- Fixed: Database Insert Issue while adding recipients with a display name containing Apostrophe (').
