## New Features and Notable Changes

### Major Change

There are no major changes for this release.

### New Features

#### eJadSPM System

- Feature added: Tax reporting is now available for those customers who have government regulations for tax reporting. This new feature is accessible under **System Configuration >> Billing Configuration >> Taxation >> Tax Report**.
- Feature added: New payment gateway "BeanStream" now supported.
- Feature added: Multiple Active Directories now supported. Now you can install eJadSPM System to manage multiple hosted services spread across single or multiple active directories. New Active Directory management menu is available at **Service Director >> Active Directory**. Please note that each new Active Directory registration requires a separate Active Directory license.
- Feature added: Generate Invoice button under Subscription management activated. This feature is quite useful if you want to generate subscription renewal invoice even before next billing cycle becomes due.
- Feature added: Completely revamped Add-on Management module is added. With this release you may create powerful add-on for Hosted Exchange service. Add-on management for other hosted service types including SharePoint, BlackBerry, Hostmatic will be available in next updates. To create add-on, go to **Service Plans >> Exchange Hosting** and click on the **Add-On Management** tab.

#### Hosted Exchange Extension
