New Features/Improvements

- Improvement: Reduces database interaction while establishing connection to HMC for Provisioning hence improving application speed.
- Improvement: Garbage records related to OU/Domain etc are removed in Exchange account cancellation during account pending state.
- New feature: Reseller module.
- New feature: Hostmatic extension.
- New Feature: Customer/Reseller access templates.

Resolved Issues

MachPanel v.3 Control Server

- Bug fixed: Error occurred when tried to "Grant Send On Behalf" and select any MailContact entry from dropdown list in Service Management of Exchange Account.
- Bug fixed: Issues related to SharePoint over HMC including addition of more

MachPanel Build v3.2.29 (Beta) Release Notes (February 20, 2009)

locales in table and provision for Webapplication (Https case).

- Bug fixed: Index was outside the bounds of the array [Distribution List Problem].
- Bug fixed: Non-availability of "Hide from exchange address list" option in HMC mode.
- Bug fixed: Could not add mail contact through MachPanel (HMC mode)
- Bug fixed: "Require that all senders are authenticated" flag does not change for Exchange 2007 distribution list.
- Bug fixed: On adding new staff user, "email already exists" error encountered.
- Bug fixed: View state error occurs when using back button of keyboard.

Known Issues

There are no known issues for this release.
