### Known Issues

- While creating new user, use keyboard to select customer's country, hit the enter key and instead of selecting that country (which is what normally happens in any web application) the form is submitted.
- Cannot add Hostmatic Server group.
- State issue: When 'US' is selected as country, it is not being pre-populated automatically.
- Bulk Add mailboxes should not be used.
- Distribution list name does not accept '.' in name field.
