## MachPanel Build v4.1.23 Release Notes (June 22, 2010)

### Resolved Issues

- Bug fixed: For Shared Hosting, protected Folders option is manageable from service management at the provider end but it is not visible in the service management at the client side.
- Bug fixed: Unable to create mailboxes (Exchange).
- Bug fixed: When a Mail Domain is added, an error message is faced: 50848 - Generic failure. (Shared Hosting)
- Bug fixed: When mailbox license limit is reached, error message is modified to "License limit reached for mailbox. Please purchase more mail boxes."
- Bug fixed: For shared hosting, when selecting MySQL 5.1 from drop down list, the database size is not populated correctly as allowed in the service plan.
- Bug fixed: When deleting a database (MS SQL or MySQL) from a Hosting Account, error occurs and database is not deleted. But deleting the database user first and then the database completes the operation successfully.

### Known Issue

There are no known issues for this build.
