2. MachPanel Remote Server v.4.1.26

Upgrade Instructions

Please follow the steps given below in sequence and execute instructions in the KB articles to complete the update:

[1. Update to Latest MachPanel](#)

[2. Update to Latest MachPanel Remote Server](#)

IMPORTANT - Update to MachPanel 4.1 Build 27: The update process followed in above knowledge base articles will automatically upgrade to latest build.

New Features/Improvements

- Improvement: The code and the currency of Switzerland has been set according to the ISO 4217 standards.
- Improvement: Spelling mistake in Home » System Configuration » System Users » Staff Roles » Add Roles , 'Help' is corrected.
- Improvement: The option for changing page size in exchange accounts has been given to the End customer, which was previously 10 records per page.
- Feature: The terms and conditions load up in a new window. Before it used to load in the same window thus removing any other previous info.

MachPanel Build v4.1.27 Release Notes (August 30, 2010)

Resolved Issues

- Bug fixed: When a sharepoint user was added through MachPanel it got added successfully but when it was deleted, the Panel showed a success message although it didn't get deleted from Panel.
- Bug fixed: When a sharepoint subscription was cancelled, the entry from ADirHostedOrganizationDetail was not removed, thus the service 'Activation for' feature in order form didn't work for any new SP subscription.
- Bug fixed: While resetting the password for user, MachPanel was generating an error.
- Bug fixed: MachPanel was unable to delete users. It would say that user was deleted but the required user would still show up in the list.
- Bug fixed: Upon successful provisioning in Exchange Mail Domains, the 'Type' was set to '-1' rather than 'Authoritative'. Furthermore errors showed up when clicking 'Set as Default' and when changing the 'Type'.
- Bug fixed: The OWA address List Search functionality in exchange 2010 was not working.

Known Issue

There are no known issues for this build.
