

Exchange Mailbox Storage Addon Creation

This article describes in detail about creating a storage addon for exchange mailbox.

Applies To:

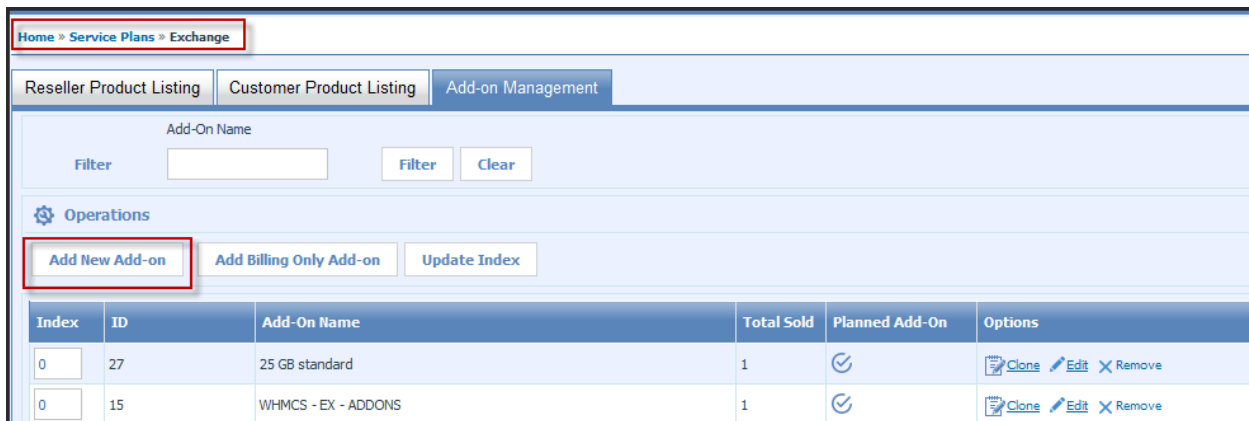

MachPanel All Versions

Scenario:

Assume that the exchange package has been made in such a way that mailbox storage is 1GB (1024 MB). Now, you want to increase mailbox storage for 'x' number of mailboxes to 10GB (10,240 MB). Note that we will specify storage 10GB in add-on as our intent is to give 9GB extra storage. This is because storage value will override the package storage value. Common perception is that in this way total storage will be 10+1=11GB, which is wrong. So if you want to have a mailbox storage to be 10GB where the package plan has storage of 1 GB. You will again enter 10GB in the mailbox storage settings.

Procedure:

- Go to **Home » Service Plans » Exchange**, select **Add-on Management** and click on **Add New Add-on** button.

Index	ID	Add-On Name	Total Sold	Planned Add-On	Options
0	27	25 GB standard	1	☑	Clone Edit Remove
0	15	WHMCS - EX - ADDONS	1	☑	Clone Edit Remove

- Type the name for the addon (name it in such a way that you can distinguish what package sells when you are selling it. Like for storage addon, name it as '10 GB Additional Storage'). Select **Mailbox Storage** from Template field.

Exchange Mailbox Storage Addon Creation

- Follow the snapshots below where a 10GB storage is being created for a mailbox having original storage of 1GB

The screenshot shows the 'Add Add-on' form in the 'Resources' tab. The 'Mailbox storage settings' section is active. It contains three rows of settings, each with a text input field and a radio button for 'Unlimited'. The first row is '* Issue warning at (MB):' with a value of '10240'. The second row is '* Prohibit send at (MB):' with a value of '10240'. The third row is '* Prohibit send and receive at (MB):' with a value of '10240'. Below the settings are 'Cancel', 'Previous', and 'Next' buttons.

Note: We have set storage to be 10GB where as our intent was to give 9GB extra storage. This is because storage value will override the package storage value. Common perception is that in this way total storage will be $10+1=11$ GB, which is wrong.

So if you want to have a mailbox storage to be 10GB where the package plan has storage of 1 GB. You will again enter 10GB in the mailbox storage settings.

Move on to the next steps and fill in the price, currency and payment cycles for this addon and then save it.

The screenshot shows the 'Add Add-on' form in the 'Associate Package(s)' tab. It features a search box labeled 'Type to search' and two list boxes: 'Selectable' and 'Selected'. The 'Selected' list box contains the item 'Base Plan test'. Between the list boxes are navigation buttons: '>>', '<<', '>', and '<'. At the bottom right, the 'Finish' button is highlighted with a red box, along with 'Cancel' and 'Previous' buttons.

Selling the Add-on:

Exchange Mailbox Storage Addon Creation

- Go to '**Subscribe Service**' for the customer to whom you want to sell the addon
- Select the appropriate currency
- Click on the Add-on icon.

The screenshot shows the 'Offline Order' page in a customer management system. The breadcrumb trail is 'Home > Customer Manager > Offline Order'. Under the 'Customer Information' section, the Customer ID is '111-111-111111' and the Owner is 'Host Admin (Provider)'. The 'Subscription' section shows the Billing Currency set to 'US Dollar'. The 'Service' section displays a grid of add-on icons: Shared Hosting, Domain Name, Exchange Hosting, SharePoint Hosting, Dynamics CRM Hosting, Skype4B Hosting, Add-on (highlighted with a red box), Dedicated Hosting, SSL Certificates, Misc. Product, and VPS Hosting.

- Select Package Type to Microsoft Exchange and you will see the Add-ons available for this package. Select the storage addon from the menu. Now put the value of x (the number of mailboxes for which storage is to be increased) in the box against Add-on name.

The screenshot shows the 'Offline Order' page with the 'Add-on Information' section expanded. The Package Type is 'Microsoft Exchange' and the Package is 'Base Plan test for...'. The 'Selectable Add-ons' table is shown below:

Add-on Type	Quantity	Add-on	Cycle	Options
<input checked="" type="checkbox"/> 10 GB Additional Storage 10240 MB	x 1	10 GB Additional Storage Setup Price: USD 0 Price: USD 0	Monthly	Preview Bill

Below the table is a 'Comments' field and 'Shopping Cart' and 'Cancel' buttons. Red arrows point to the 'Microsoft Exchange' dropdown and the 'x' in the quantity field.

- Move to the shopping cart, then click next, then generate transaction ID for this item

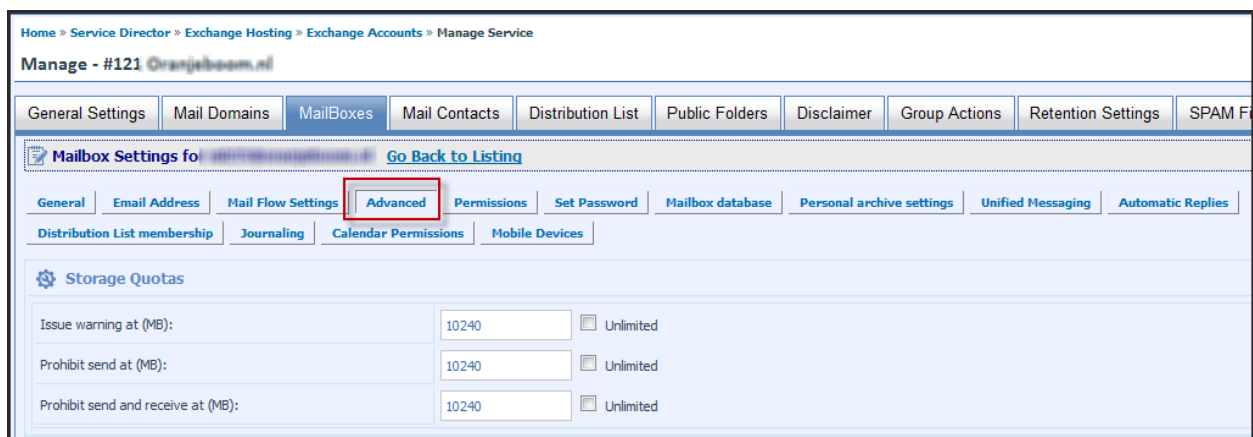

Exchange Mailbox Storage Addon Creation

and then save it.

- Now this item has been placed in the 'Service Queue'. Go to the queue and hit 'Run' or you can wait for the service queue to run it by itself. Items in the service queue are automatically 'run' within few minutes of their placement in the queue if the provisioning service is running.

Changing the Storage:

This is the final step. Go to the mailbox settings for which you want to increase the storage. Then go to **Advanced** and enter the new mailbox storage values and save it :

Home » Service Director » Exchange Hosting » Exchange Accounts » Manage Service

Manage - #121 Oranjeboom.nl

General Settings | Mail Domains | MailBoxes | Mail Contacts | Distribution List | Public Folders | Disclaimer | Group Actions | Retention Settings | SPAM F

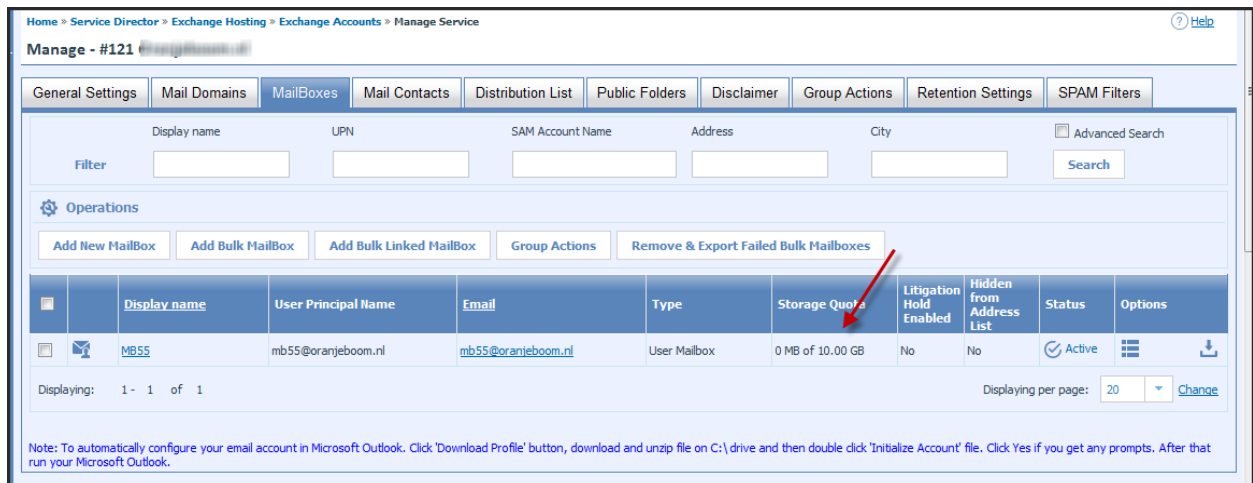

Mailbox Settings for [mb55@oranjeboom.nl] [Go Back to Listing](#)

General | Email Address | Mail Flow Settings | **Advanced** | Permissions | Set Password | Mailbox database | Personal archive settings | Unified Messaging | Automatic Replies

Distribution List membership | Journaling | Calendar Permissions | Mobile Devices

Storage Quotas

Issue warning at (MB):	<input type="text" value="10240"/>	<input type="checkbox"/> Unlimited
Prohibit send at (MB):	<input type="text" value="10240"/>	<input type="checkbox"/> Unlimited
Prohibit send and receive at (MB):	<input type="text" value="10240"/>	<input type="checkbox"/> Unlimited
