- At this point you have successfully added the Hostmatic Control Server in MachPanel. Now you need to add services in the recently added server. So click on the recently added Hostmatic Control Server group.
- You will see the list of Web Hosting Server being added in this Server Group. To add Web Hosting Services in the Hostmatic Server, click **Services** in the options menu

Integrating Web Hosting Services with MachPanel

against the desired server. then click on **Add Service** button.

- From the **Service** drop down menu, select the Service you want to add.

- After selecting the service, you will be taken to their respective pages. Fill the required information for the services and save. Add multiple services as per your requirements. Please review following KB article for more details:

Integrating Web Hosting Services with MachPanel

<http://kb.machsol.com/Knowledgebase/Article/53474>

- Below is a snapshot of Web, DNS services added in the above Hostmatic Server.

The screenshot shows the 'Services' tab in the MachPanel interface. The breadcrumb trail is 'Home > Service Director > Web Hosting > Server Groups'. Below the tabs, there is an 'Add Service' button. A table lists the installed services:

Status	Service Name	Type	Provider	Options
Enabled	Simple DNS Plus	DNS	Simple DNS Plus	Test Service Disable Edit Remove
Enabled	IIS 10	Web	Internet Information Server 10	Test Service Disable Edit Remove

At the bottom, it says 'Displaying: 1- 2 of 2' and 'Displaying per page: 20 Change'.

- Hit **Test Service** for each service and if you get below snapshot then integration of that service is successful.

The screenshot shows a 'Test Report' dialog box with the following text:

```
»» Trying to connect with MachPanel Remote Server....
»» Connected to MachPanel Remote Server [IP Address]...

»» Trying to communicate with IIS....
»» Connection Successful
```

There is an 'Ok' button at the bottom.
