Important Pre-requisites

1. MachPanel Control Server v.4.2.24
2. MachPanel Remote Server v.4.2.24

Upgrade Instructions

Please follow the steps given below in sequence and execute instructions in the KB articles to complete the update:

1. Update to Latest MachPanel
2. Update to Latest MachPanel Remote Server

New Features/Improvements

- Added SharePoint 2010 multi-language Support
- Add Note in Outlook Profile zip file
- Upon changes to MachPanel Website Address in Configuration Studio, Logo URL and URL for the Desktop Icon for MachPanel also changes.
- Encryption of sensitive data like Domain login, password, mailbox login, password etc.

MachPanel 4.2 BUILD 26 Release Notes (July 13, 2011)

- Re-designing of DNS module, handle DNS based on template in all modules.
- MachPanel Remote Server Update improved.
- Email Template Description of change in password improved.
- Hide option for Domain Registration Tab in Store
- Hide disabled buttons "RE-activate" and "Control"
- Separate Application Pool is created for each shared hosting domain/website
- Remove modules node from configuration studio. Make Configure as home page.
Remove Sync option from Active Directory screen.
- BB Activation: When entering value for "Activation password expires in" , unit of the value should also be displayed e.g. hours/days
- Mailbox storage shown in MB rather than exact values like 0.000987
- Mailbox usage report shows the exchange flavor of that mailbox i.e. whether it is basic, standard or standard plus

Resolved Issues

- MailEnable: Fixed problem related to Domain Alias while creating Duplicate Domain alias
- MailEnable: Fixed problem related to Email Accounts where input string was not in a correct format.
- MailEnable: Fixed problem related to Email Accounts where Password Mismatch issue existed.
