

Importing SharePoint into MachPanel via Import Utility.

Summary

This article provides information for using SharePoint Import Utility for importing SharePoint users in MachPanel.

Applies To

MachPanel Version 4.2.30 and above.

Pre Requisites

- You have purchased license from the sales team.
- At least one SharePoint service plan is present in MachPanel.
- Customer account has been created.
- SharePoint Server on which the users exist has been added in MachPanel with the appropriate web application.

Procedure

*** It is strongly recommended that to import a test organization first as a Proof of Concept.**

Please follow the below mentioned steps to bulk import SharePoint users:

1) Open MachPanel Control Panel, log in as Provider and navigate to **Home >> Import Utilities >> SharePoint**. In step-1 provide the Import Settings as shown in the snapshot below:

The screenshot shows the 'Sharepoint Import Wizard' interface in MachPanel. The breadcrumb navigation at the top reads 'Home > Import Utilities > SharePoint'. The wizard has three steps: 'Step-1' (active), 'Step-2', and 'Step-3'. The main content area for Step-1 includes a description: 'Sharepoint import wizard makes it easy to bulk import Sharepoint based hosted organizations.' It lists 'Pre-requisites' (1. At least one Sharepoint Service Plan should be created, 2. The customer account should be present, 3. All the users of a portal to be imported, must belong to a single ornaizational unit.) and 'Post-import tasks' (1. Verify and fix resources allocated to customer and reseller(Owner) according to actual usage.). Below this is the 'Import settings' section with two fields: 'Company Name [Owner:]' set to 'Machsol Support [Host Admin (Provider)]' and 'Server:' set to 'SP1-ess2019.local[10.1.210.117] [http://sp1-ess2019.local]'. A 'Next' button is located at the bottom right.
