

# Importing SharePoint into MachPanel via Import Utility.

## Summary

This article provides information for using SharePoint Import Utility for importing SharePoint users in MachPanel.

## Applies To

MachPanel Version 4.2.30 and above.

## Pre Requisites

- You have purchased license from the sales team.
- At least one SharePoint service plan is present in MachPanel.
- Customer account has been created.
- SharePoint Server on which the users exist has been added in MachPanel with the appropriate web application.

## Procedure

**\* It is strongly recommended that to import a test organization first as a Proof of Concept.**

Please follow the below mentioned steps to bulk import SharePoint users:

1) Open MachPanel Control Panel, log in as Provider and navigate to **Home >> Import Utilities >> SharePoint**. In step-1 provide the Import Settings as shown in the snapshot below:

Home > Import Utilities > SharePoint

### Sharepoint Import Wizard

Step-1 Step-2 Step-3

Sharepoint import wizard makes it easy to bulk import Sharepoint based hosted organizations.

**Pre-requisites:**

1. At least one Sharepoint Service Plan should be created.
2. The customer account should be present.
3. All the users of a portal to be imported, must belong to a single ornaizational unit.

**Post-import tasks:**

1. Verify and fix resources allocated to customer and reseller(Owner) according to actual usage.

**Import settings**

Company Name [Owner]: Machsol Support [Host Admin (Provider)]

Server: SP1-ess2019.local[10.1.210.117] [http://sp1-ess2019.local]
