Exchange SPLA reports in MachPanel

Summary

This article provides information regarding **SPLA** reports in MachPanel Control server.

Applies To

MachPanel V 6.5.25 and later

Procedure

To view Exchange SPLA report, navigate to the following path: ***Home » Service Director » Exchange Hosting » Reports***

SPLA reports are shown in MachPanel by following standards:

BASIC

Mailboxes having OWA, POP, IMAP access but having no MAPI access

STANDARD

Mailboxes having basic features, plus MAPI access

STANDARD PLUS

Mailboxes having standard features plus outlook/MAC client CAL (There is absolutely no way to be entirely sure who uses which client/license with which account. Any mailbox with checkbox "Outlook Licenses" checked would be counted as Standard Plus. All other mailboxes (with other standard-features) would be counted as Standard.

ENTERPRISE

Mailboxes having all Enterprise features plus journaling archiving, In-place and Litigation Hold except **Outlook Licenses**

ENTERPRISE PLUS

Mailboxes having all Enterprise Plus features including Outlook licenses.
