

Add Custom URL in System Navigation

Summary

This article describes the procedure for creating custom nodes and URL in MachPanel

Applies To

MachPanel Version 6.0.20 and above

Procedure

1. As part of MachPanel customization, custom nodes and URL can be added in MachPanel by going to **Home >> System Configuration >> Menu Settings:**
2. You can enter a custom URL in System Navigation area for Provider/Resellers/End Customers.
3. Also Reseller can create custom URL in System Navigation from themselves and their customers.
4. In the functionality of adding/editing/removing custom menu for MachPanel, an enhancement is added to allow end users to provide title of the menu item in multiple languages. Until now it was only possible to set the title of the menu in single language.

Provider/Reseller Menu Customer Menu

Custom URL

Home
+ Customer Manager
+ Billing Manager
+ Help Desk
+ Service Director
+ Service Plans
+ Sales
+ Import Utilities
+ System Configuration
+ Online Help

Custom URL Options

Node Selected : Home

* Node title :
Select Language Node title
English(en-US)
Chinese(zh-CN) Add

* Node URL : http://

Node Icon Choose File No file chosen

Show on reseller:

Resellers :
Type and press enter to search
