

MachPanel Database automatic failover using MSSQL mirroring

MachPanel Database automatic failover using MSSQL mirroring

The default connection string is: Data Source=.\machpanelsql2005;Initial Catalog=MachPanel_Db;User ID=MachPanel_Db;Password=D4006127e\$;

You will have to modify above string to add Failover Server name after the principal server:

Data Source=.\machpanelsql2005;**Failover Partner=**;Initial Catalog=MachPanel_Db;User ID=MachPanel_Db;Password=D4006127e\$;

For example you have second SQL server SQL2 then connection string would be:

Data Source=.\machpanelsql2005;Failover Partner=sql2;Initial Catalog=MachPanel_Db;User ID=MachPanel_Db;Password=D4006127e\$;

Note: Please note that we can perform SQL Mirroring configuration for you under professional services, let us know if you are interested.
