- o Added ability to create a Room List Distribution Group.
- o Added CASArray settings in MachPanel.
- o Problem fixed where CRM and SharePoint users were not getting listed at Exchange User creation Page.
- o Fixed problem with Public Folder usage count which was always zero.
- o Enhanced bulk mailbox creation in a way that checks while adding bulk mail boxes using .csv file should work at the time of csv processing.
- o Fixed problem with quotas where resellers were able to sell more space then they purchased.

- **MachPanel Billing:**

- o Fixed problem with payment cancellation.
- o Fixed issue with decimal point payment via Raven Gateway.

Known Issues

- Since new theme is applied, removal of cookies from browser may be required to make MachPanel work properly.
- Clicking on **Set Default** from Silver to Default or from Default to Silver in the **Layout Settings >> Theme Settings** it doesn't changes from Silver to Default or from Default to Silver.

MachPanel 4.3 BUILD 11 Release Notes (May 21, 2012)

The solution is to locate the browser cookie specific to the website address (IP or hostname) and remove them every time '**Set as Default**' is changed. Alternatively, a quicker way for theme change is to use the dropdown **Theme** option at the upper right corner on screen after login. Whenever theme is required to be changed, click on **Set Default** link and then switch between themes from dropdown **Theme** option at the upper right corner.
