Procedure:

HotFix 4313

- First of all take backup of your control and remote servers. See below kb article for more details on how to take backup. http://kb.machsol.com/Knowledgebase/Article/50248
- 2. Go to **MachPanel configuration studio.**
- 3. Stop all services related to MachPanel.
- 4. Exit MachPanel configuration studio.
- 5. Download the Hotfix 4.3.13.zip file from below link: http://www.machsol.com/Downloads/patch/hotfix4313.rar
- 6. Unzip the Hotfix 4.3.13.zip file using password **P@ssw0rd@hotfix**.
- 7. Replace files from MachPanel folder from Hotfix folder extracted on MachPanel control server keeping the folder hierarchy same as it is in hotfix.
- 8. Execute script from zip file on MachPanel_Db after logging in to SQL management studio as MachPanel_Db user. Password can be obtained from connection string in registry of MachPanel Control Server.
- 9. Open *services.msc* on MachPanel remote servers and stop MachPanel provisioning service.
- 10. Make sure MachPanel configuration studio is not running from task manager.
- 11. Replace dll file from remote server folder of Hotfix folder on MachPanel remote server.
- 12. Once all files are replaced properly from HotFix folder restart all services related to MachPanel.
