Summary

This article provide a summary for configuring response groups in Skype4B service management.

Applies To

This article applies to MachPanel build v6.0.20 HF1 and later.

How the Response groups be added?

To add a response groups, you need to specify the **Application Server FQDN** in Lync Server.

Home > Service Director > Skype4B Hosting > Server	Groups > Add Server Group		
Step-1 Step-2 Step-3			
Add Pool Information:			
*Enter Front End Pool FQDN:	FEpool.machsol.local		
Enter Application Server FQDN:	FEpool.machsol.local	0	
*Enter comma separated IPs of all Front End Server(s) associated with above Front End Pool:	10.10.10.21		•
Enter FQDN of Persistent Chat Server (If Deployed) associated with above Front End Pool:	10.10.10.21		
Access Edge Service FQDN:	10.10.10.21		
Handle DNS:			

Adding Agent Groups:

Agent groups contain a specified set of user accounts that belong to a Response Group. How calls are routed in the group, and what options a member has are configured at the agent group level.

To add a new groups, navigate to path: Home » Service Director » Skype4B Hosting »

Accounts » **Manage Service**and add a new Group by clicking on **Add New Group** button under the tab **Response Groups**>> **Groups**. See the snapshot below:

Home > Service Director > Skype4B Hosting > Accounts > Manage Service							
Manage - #4 CloudEVoice

Adding Queues:

A queue is an object that holds callers as they dial in to the Response Group. A queue can contain multiple agent groups or sometimes just a single agent group is included. Settings such as timeouts and call capacity are configured at the queue level.

To add a new Queue, select **Queue** tab under **Response Groups** and click on **Add New Queue** button. See the snapshot below:

Home > Service Director > Skype4B Hosting > Accounts > Manage Service							
Manage - #4 CloudEVoice

Adding Workflows:

There are two types of workflows that are supported in MachPanel Hunt groups, and interactive groups. Workflows are the glue that ties together the agent groups and queues. The workflow settings determine how a caller reaches a specific queue depending on question responses, time of day, or holidays.

To define workflow, select the **Workflows** tab from the **Response Groups**. and click on **Add New Workflow** button.

See the snapshots below:
