

Hotfix for MachPanel build v5.1.10 (Updated on September 1st 2014)

Summary

This article provides cumulative fix & information about how to apply fix on your servers.

Applies To

This article applies to MachPanel v5.1.10.

Important Notes

- Prior to performing any update take backup of your MachPanel Database, Control and Remote servers. See below KB article for more details on how to take backup. <http://kb.machsol.com/Knowledgebase/Article/50248>
- MachPanel Control Panel and all MachPanel Remote Servers need to be on build 5.1.10 and then hotfix can be applied. Please follow the steps given below in sequence and execute instructions in the KB articles to complete the update:
 1. [Update to Latest MachPanel](#)
 2. [Update to Latest MachPanel Remote Server](#)

Latest Issues Fixed

This patch includes the latest fixes as below:

1. Public Folder cannot be deleted.
2. Set-CASMailbox fails due to duplicate CAS policies in Exchange2010 /hosted mode.

Procedure

1. Go to **MachPanel configuration studio**.
2. Stop all services related to MachPanel.
3. Exit MachPanel configuration studio.
4. Download the hotfix **Commulative fix5.1.10.zip** file from the attachments.
5. Open **services.msc** on MachPanel remote servers and stop MachPanel provisioning service.

Hotfix for MachPanel build v5.1.10 (Updated on September 1st 2014)

6. Make sure MachPanel configuration studio is not running from task manager.
7. Replace files from **Control Server** folder on MachPanel control server and Replace files from **Remote server** folder of hotfix folder on MachPanel remote server keeping the folder hierarchy same as it is in hotfix.
8. Execute script from zip file on MachPanel_Db after logging in to SQL management studio as MachPanel_Db user. Password can be obtained from connection string in registry of MachPanel Control Server.
9. Once all files are replaced properly from hotfix folder restart all services related to MachPanel.
