Persian Language

Summary

This article provides persian language for the MachPanel.

Applies To

This article applies to MachPanel build v5.1.10.

Important Notes

- Please take backup of your MachPanel Database, Control and Remote servers. See below KB article for more details on how to take backup. http://kb.machsol.com/Knowledgebase/Article/50248

- MachPanel Control Panel and all MachPanel Remote Servers need to be on build 5.1.10.

How to apply Persian language?

1. Go to **MachPanel configuration studio.**
2. Stop all services related to MachPanel and exit MachPanel configuration studio.
3. Download the **Persian.zip** file from the attachments.
4. Make sure MachPanel configuration studio is not running from task manager.
5. Replace files on MachPanel control server keeping the folder hierarchy same.
6. Execute script from zip file on MachPanel_Db after logging in to SQL management studio as MachPanel_Db user. Password can be obtained from connection string in registry of MachPanel Control Server.

7. Once all files are replaced properly from folder restart all services related to MachPanel.
