

Setting Password Policy in MachPanel

Summary

This article describes how to set up Password Policy in MachPanel for Staff Users as well as throughout the control panel for all password fields like Mailbox or any type of user creation.

Applies To

MachPanel Version 5.2.10 HF2 and above.

Solution

The provider can set up Password Policy in MachPanel to match their Active Directory Password policy so that the password complies with back-end policy before actually attempting to process a request to set password.

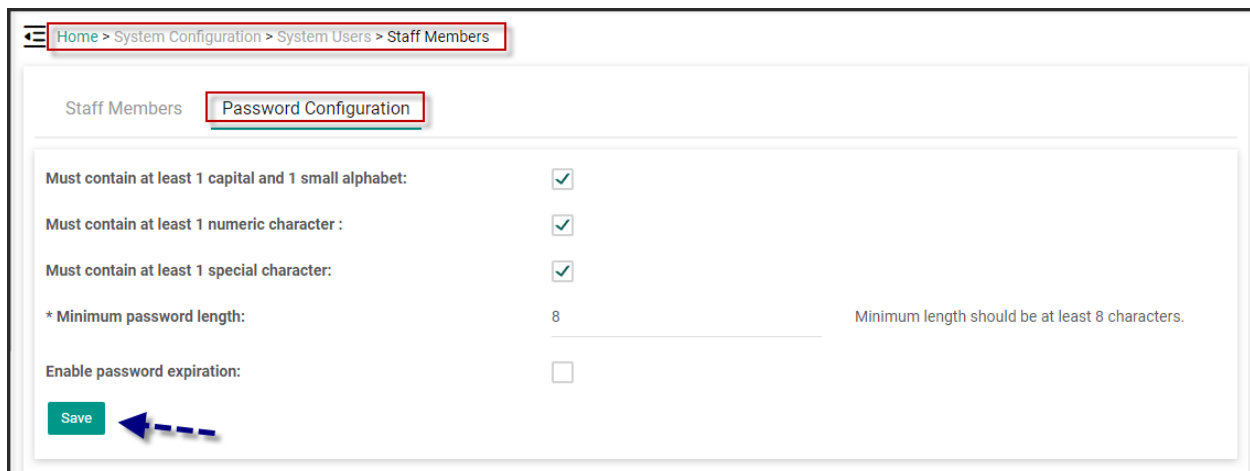

We have implemented password policy for staff users set by Provider as default rules to follow for Active Directory User password in Enterprise modules.

The errors generated due to weak password input while creating Mailbox, SharePoint, Lync etc. in job processing can be avoided by setting a matching policy for password in AD and Password Policy for Staff user in Provider settings.

MachPanel will give error if password does not meet requirement before adding single or bulk user/mailbox.

Sample Scenario:

If we set up Password Policy as follows:

The screenshot shows the MachPanel interface for configuring password policy for Staff Members. The breadcrumb navigation at the top reads: Home > System Configuration > System Users > Staff Members. Below this, there are two tabs: 'Staff Members' and 'Password Configuration', with the latter being the active tab. The configuration settings are as follows:

Requirement	Status
Must contain at least 1 capital and 1 small alphabet:	<input checked="" type="checkbox"/>
Must contain at least 1 numeric character :	<input checked="" type="checkbox"/>
Must contain at least 1 special character:	<input checked="" type="checkbox"/>
* Minimum password length:	8
Enable password expiration:	<input type="checkbox"/>

A note on the right side states: "Minimum length should be at least 8 characters." At the bottom left, there is a green 'Save' button, which is highlighted by a blue dashed arrow.

Setting Password Policy in MachPanel

Following or similar passwords will fail with error shown below:

- passwordabcdefgh
- PASSWORDABCDEFGH
- password91113156
- PASSWORD91113156
- Password91113156

Your password length must be minimum 12 characters long. Must contain at least one capital letter and one small letter. Must contain at least one numeric value. Must contain at least one special character. ✕

[Home](#) > [Service Director](#) > [Exchange Hosting](#) > [Exchange Accounts](#) > [Manage Service](#)

Manage - #44 SVCaccount

[General Settings](#) [Mail Domains](#) [MailBoxes](#) [Mail Contacts](#) [Distribution List](#) [Public Folders](#) [Wireless Service](#)
[Disclaimer](#) [Group Actions](#) [Compliance Management](#) [Mobile device mailbox policy](#) [Application Impersonation](#)
