5.2.10 HF3 - Hotfix 3 for MachPanel build v5.2.10 (26th March 2015)

Procedure

1. Go to **_MachPanel configuration studio._**
2. Stop all services related to MachPanel.
3. Exit MachPanel configuration studio.
4. Download the hotfix **v5.2.10-HF3.zip** file from the link at bottom of this page.
5. Open **_services.msc_** on MachPanel remote servers and stop MachPanel provisioning service.
6. Make sure MachPanel configuration studio is not running from task manager.
7. Replace files from **Control Server** folder on MachPanel control server and Replace files from **Remote server** folder of hotfix folder on MachPanel remote server keeping the folder hierarchy same as it is in hotfix. (you should get message to overwrite files, if not you are not doing it right).

8. Execute script from zip file on MachPanel_Db after logging in to SQL management studio as MachPanel_Db user. Password can be obtained from connection string in registry of MachPanel Control Server.
   (**_HKEY_LOCAL_MACHINE\SOFTWARE\MachSol\MachPanel_**)

9. Once all files are replaced properly from hotfix folder restart all services related to MachPanel on Control as well as Remote Servers.
