

Internet Explorer security restrictions

Summary

This article provide a summary on how to remove Internet Explorer security restrictions.

Applies To

This article applies to IE 10\11.

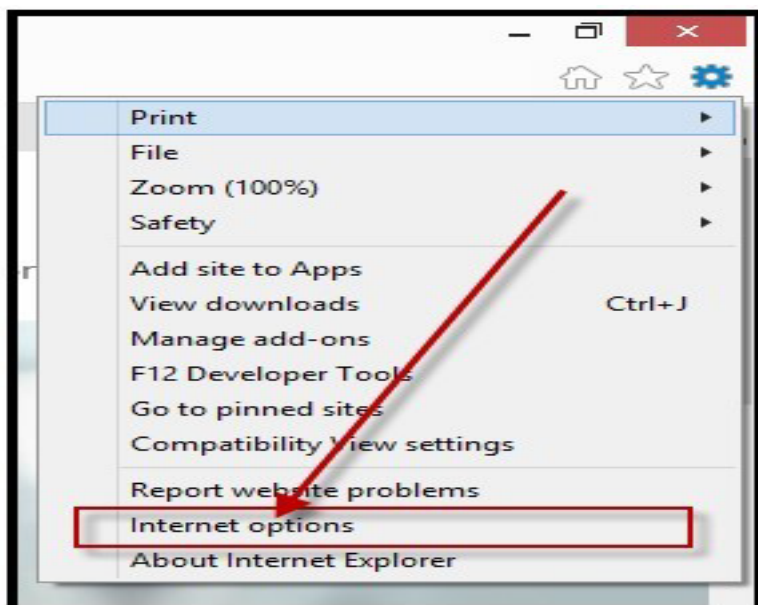

Problem \ Issue with MachPanel Interface:

If your control panel navigation is not working from Menu and clicking on any link doesn't do anything, then perform steps below.

Steps to Resolve:

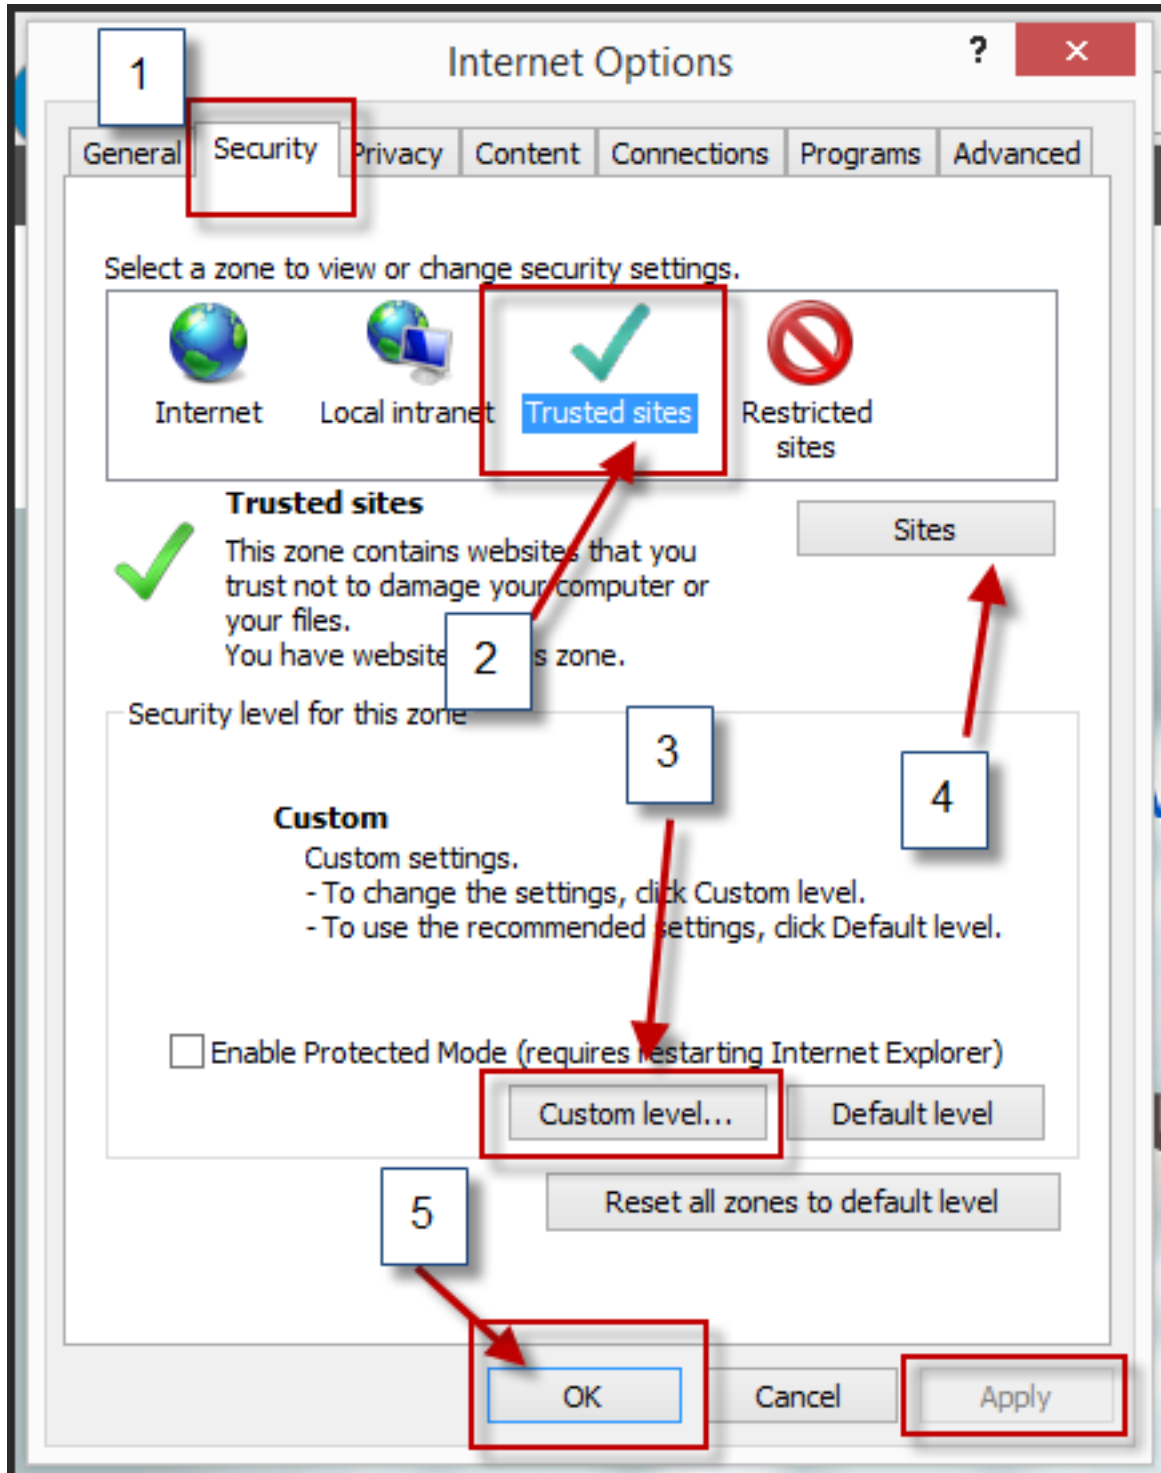

The problem is due to Internet Explorer security restrictions. Either use a different browser (Firefox) or perform following steps in IE 10\11 to allow the control panel website to load the page with all scripts.

- Go to "Internet Options" under your Internet Explorer.

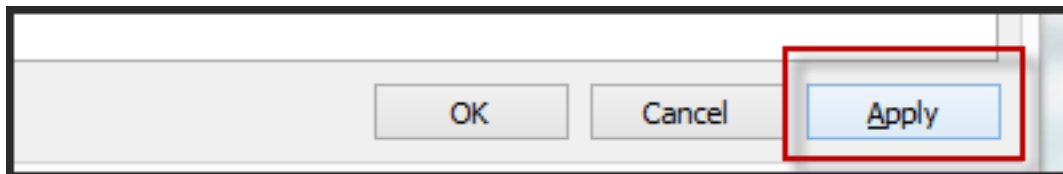

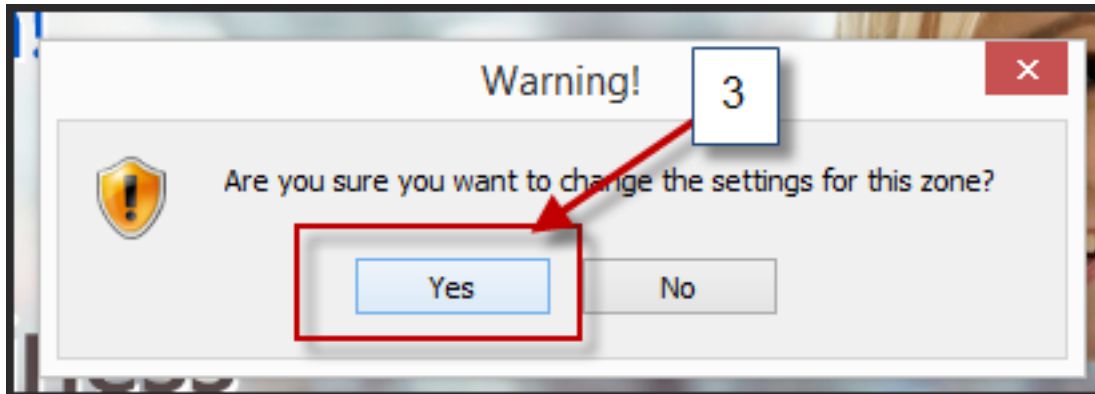

Internet Explorer security restrictions

- Select **Security (1)** tab and select **Trusted Sites (2)** as shown below:

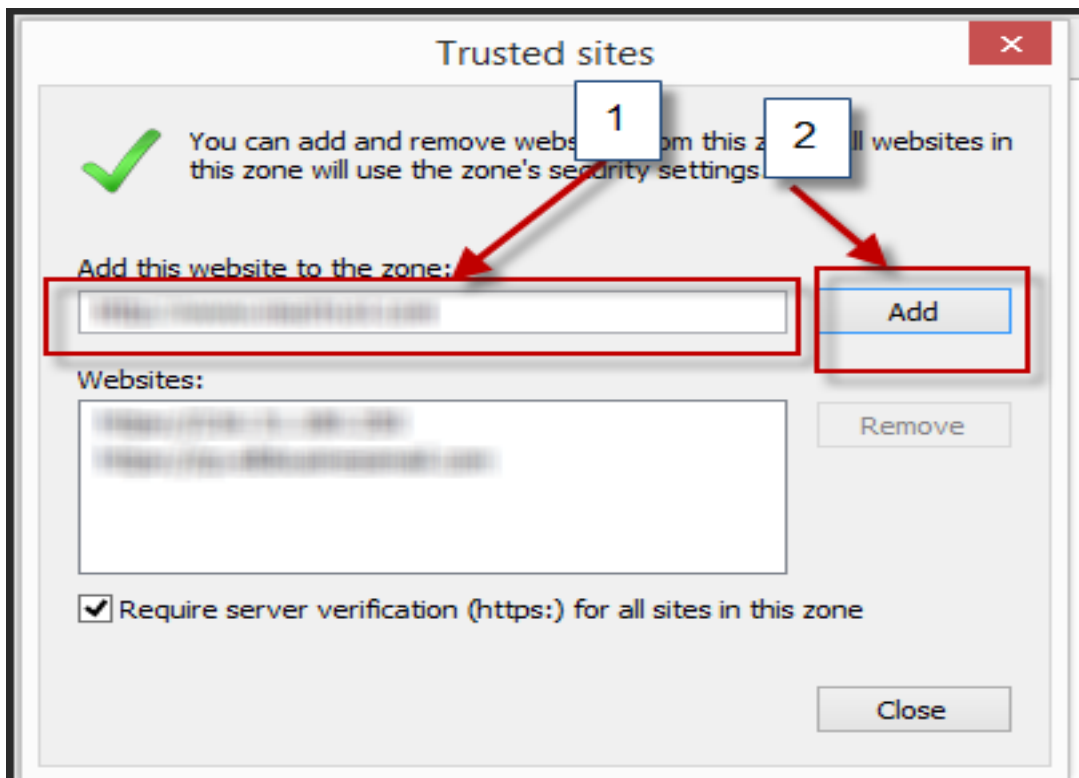

- **Details of step 3:** Click on **Custom Level (3)** and reset to **Low** as show below:

Internet Explorer security restrictions

- **Details of step 4:** Under **Security (1)** tab (see second screenshot on the article) click on **Sites (4)** button and add control panel site to the trusted zone.

Internet Explorer security restrictions

Important:

After making above change, reload the control panel website by pressing "CTRL + F5" and check panel functionality.
