Summary

This article provide a summary on how to remove Internet Explorer security restrictions.

Applies To

This article applies to IE $10\11$.

Problem \ Issue with MachPanel Interface:

If your control panel navigation is not working from Menu and clicking on any link doesn't do anything, then perform steps below.

Steps to Resolve:

The problem is due to Internet Explorer security restrictions. Either use a different browser (Firefox) or perform following steps in IE 10\11 to allow the control panel website to load the page with all scripts.

• Go to "Internet Options" under your Internet Explorer.

• Select **Security (1)** tab and select **Trusted Sites (2)** as shown below:

• Details of step 3: Click on Custom Level (3) and reset to Low as show below:

Warning! 3 Are you sure you want to change the settings for this zone? Yes No

ОК	Cancel	Apply	1

• **Details of step 4:** Under **Security (1)** tab (see second screenshot on the article) click on **Sites (4)** buton and add control panel site to the trusted zone.

Trusted sites
You can add and remove webs 1 pm this z 2 II websites in this zone will use the zone's security settings Add this website to the zone:
Websites:
Remove
Close

Important:

After making above change, reload the control panel website by pressing "CTRL + F5'' and check panel functionality.
