

# Set Priority of Group Jobs

## Summary

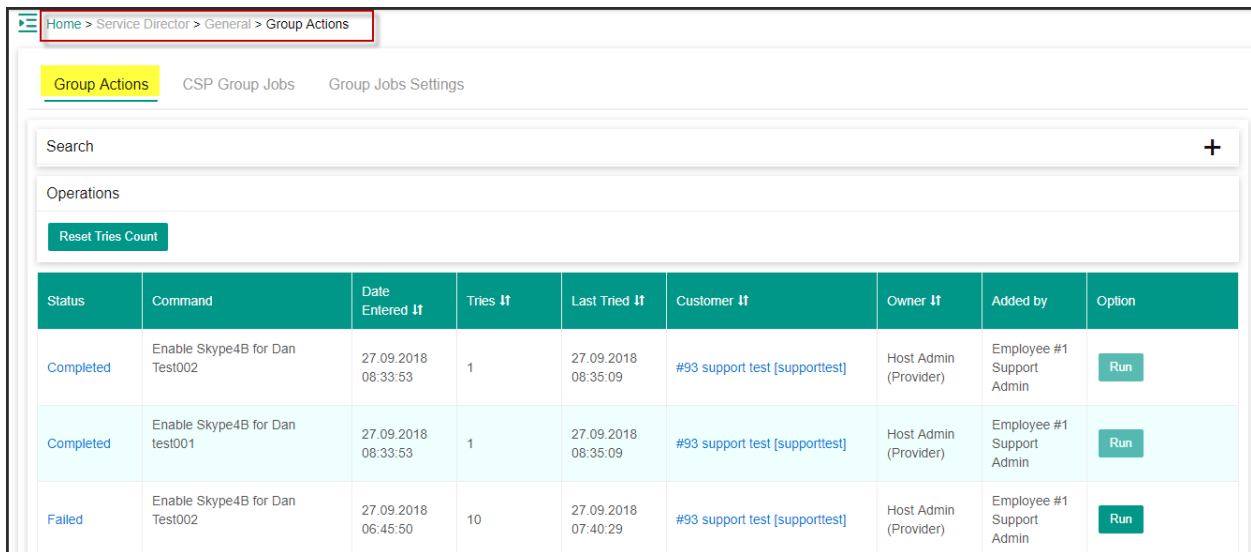

This article provides summary on how to set priority of group jobs via MachPanel.

## Applies To

This article applies to MachPanel build version 5.3.10 & above.

## Group Actions on a single interface

Navigate to the path: **Home » Service Director » Group Jobs** Under Group jobs tab will list all service type group Jobs in one interface and can be filtered for each service type.

The screenshot shows the MachPanel interface for Group Actions. The breadcrumb path is Home > Service Director > General > Group Actions. The main heading is Group Actions, with sub-headings for CSP Group Jobs and Group Jobs Settings. There is a search bar and a 'Reset Tries Count' button. Below is a table with columns: Status, Command, Date Entered, Tries, Last Tried, Customer, Owner, Added by, and Option. The table contains three rows of job execution data.

Status	Command	Date Entered	Tries	Last Tried	Customer	Owner	Added by	Option
Completed	Enable Skype4B for Dan Test002	27.09.2018 08:33:53	1	27.09.2018 08:35:09	#93 support test [supporttest]	Host Admin (Provider)	Employee #1 Support Admin	Run
Completed	Enable Skype4B for Dan test001	27.09.2018 08:33:53	1	27.09.2018 08:35:09	#93 support test [supporttest]	Host Admin (Provider)	Employee #1 Support Admin	Run
Failed	Enable Skype4B for Dan Test002	27.09.2018 06:45:50	10	27.09.2018 07:40:29	#93 support test [supporttest]	Host Admin (Provider)	Employee #1 Support Admin	Run

In order to allow service provider to configure Number of Group jobs to process and their respective priority, click on **Group Jobs Settings** tab as shown below:

It has Exchange, Skype4B(Lync), CRM, SharePoint and AD Group jobs Actions Types. Now we can set the priority of a job execution on the basis of action type. We can set number of threads to execute simultaneously through this interface.

Priority index is from 0 to 10 , 0 is a highest priority and 10 is the least priority. There is a **Reset Priority Order to System Default** button, it will reset to default priority which is according to panel domain experts.

## Set Priority of Group Jobs

1. You can see group action types for all extensions\modules in grouped interface i.e. panel for each extension with proper heading.
2. For Each extension\modules in MachPanel have selection for Number of group jobs to process simultaneously ranging between 1 to 5.
3. Provide Priority index in dropdown for each action type inside particular extension\module.

Click on **Save Settings** button when done.

**Note:** You can Manage (Hide\Unhide) Group Jobs Settings for your Customer \Resellers through Access Templates:
