How to Create Skype4B user and choose Dial Plan?

- Subscribe a Customer to the desired Service Plan, in which you associated your desired Dial Plans and Provision the service from service queue.
- After Successful Provisioning, **Manage** the desired **Account**.
- Click on **Users Tab** and then add new user.
- Choose your desired Dial Plan.
- The Conference Dial-In number which was associated with the dial plan will be used while generating meeting requests for this user.

The screenshot shows a user creation form with the following fields and values:

- Line URI:** +11234567890 (US, N/A, DID) [Dropdown arrow]
- Extension:** [Green info icon]
- Private Line:** -- Select -- [Dropdown arrow]
- Extension:** [Green info icon]
- Linked User:** [Green info icon] ☐ Enter Object SID: [Green info icon]
- Dial Plan:** [Green radio button] CloudVoice Plan
- Voice Policy:** [Green radio button] Global
- Conferencing Policy:** [Green radio button] Global
- Associate Call Bundle:** -- Select -- [Dropdown arrow] [Green info icon]
- Optional Fields:** [Section header]

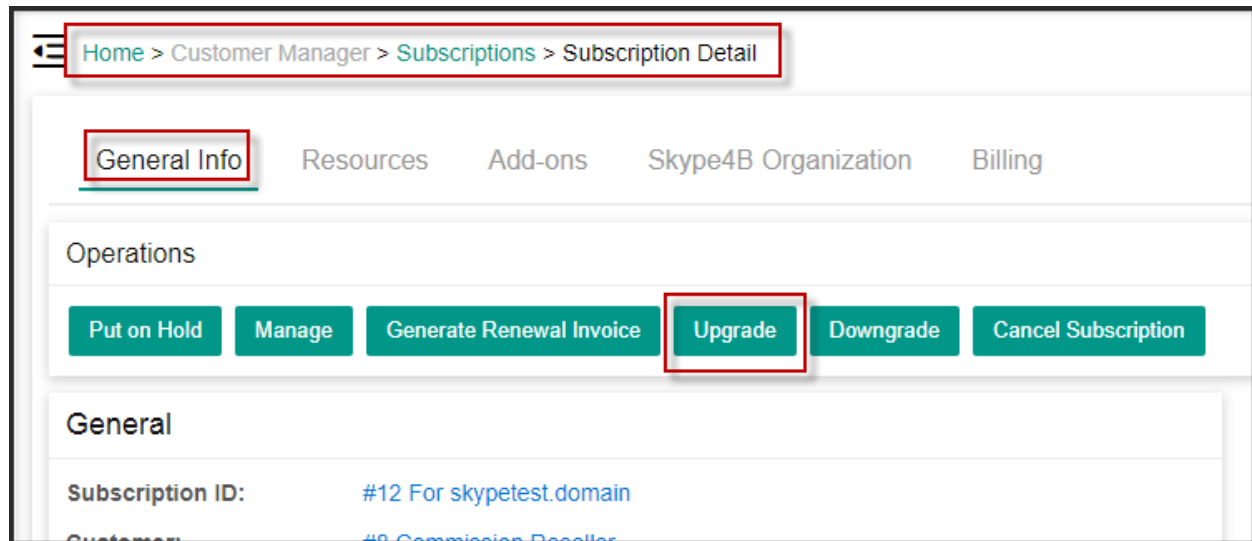

Last but not the least, if you have an existing organization for which you want to update Dial Plan, you first have to Update their Service Plan by Performing and Upgrade or Downgrade of Subscription to your desired Service Plan, after which you will be able to see desired options in Dial Plan Section.

Create New Service Plan and Edit older (plan the customer is currently subscribed to):
