Procedure

- Go to **MachPanel configuration studio**.
- Shut down all the MachPanel services and also exit the configuration studio. Make sure no instance to MachPanel Configuration Studio is running under any user.

- Download the hotfix **HF1-10October2018.zip** file from the link at

Hotfix - HF1 for MachPanel build v6.0.32 (Updated 10-Oct-2018)

bottom of this page.

- Stop IIS Admin Service, please make sure that all the services are STOPPED from MachPanel Configuration Studio. Verify from "Task Manager" that the following services are not running.

1. MachSol.MachPanel Provisioning Service.
2. MachSol.MachPanel.ConfigurationStudio.exe.
3. MachPanel Billing Service.
4. MachPanel Helpdesk Service.
5. MachPanel Network Service.
6. MachPanel License Service.
7. MachPanel O365 Service.

- Replace files from **MachPanel** folder on MachPanel control server (**Path: C:\Program Files\MachSol\MachPanel Control Server**) and Replace files from **Remote server** folder of hotfix folder on MachPanel remote server (**C:\Program Files\MachSol\MachPanel Remote Server**) keeping the folder hierarchy same as it is in hotfix. (you should get message to **overwrite files**, if not you are not doing it right).
- Execute script.txt from zip file on **MachPanel_Db** after logging in to SQL management studio as MachPanel_Db user. Password can be obtained from connection string in registry of MachPanel Control Server.

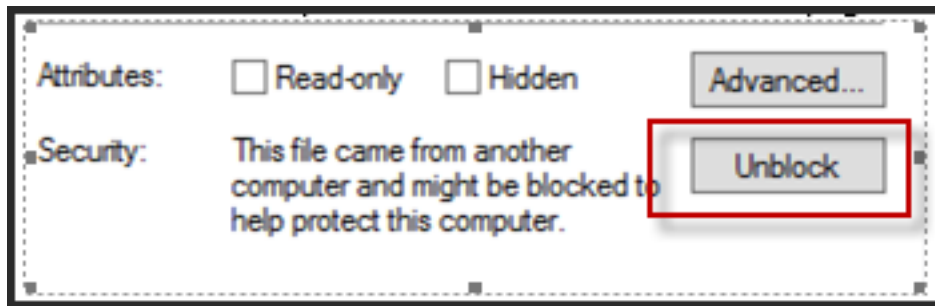

Hotfix - HF1 for MachPanel build v6.0.32 (Updated 10-Oct-2018)

- Once all files are replaced properly from hotfix folder **Restart** all services related to MachPanel on Control as well as Remote Servers.
