MachPanel Build v6.0.36 Release Notes (Oct 16, 2018)

actions.

4. New Feature\Improvements

- **General (Active Directory, Billing, API, ADSync)**
 - Password for Customer, Contact, Staff users are saved in database using one way secure hash to improve security.
 - Hide Tickets & Domain name summary from Reseller profile when modules are disabled
 - Update logos of enterprise modules and login page background.
 - Allow Super Admin Role to perform all operations that the 1st default Admin of a company can do.
 - Many new permissions added under Staff roles for granular security.
 - After deploying a new update, user will now have to re-login to avoid errors due to update.
 - If the contact is not found on backend and you try to delete it, the entry gets cleared from MachPanel instead of throwing object not found error.
 - Enhanced Online Store, option to login added on successful purchase.
 - Added support for Nested OU structure so that Users, Groups and Contacts can be created in designated sub OUs under an Organization OU for better management.
 - Added support for OU creation under reseller OU.
 - Added support for importing Organizations from backend where Nested OU structure is used, helping users to import from CPSM (Cloud Portal Services Manager) which is owned by Citrix, and other such management control panels / products ?
- **Exchange**
 - Convert user mailbox to shared or room or equipment mailbox and viceversa
 - Allow brackets () for LDAP URLs
 - Allow multiple disclaimer creation under disclaimer tab
 - Exchange Interfaces slow response mitigation
 - Add mobile attribute to mailbox usage report
 - Indicate mailbox quota consumption using text background Color

MachPanel Build v6.0.36 Release Notes (Oct 16, 2018)

- Manage interface on room mailbox creation
- **Skype for Business \ Lync**
 - Add "Sync Response Groups" from backend button for provider in SfB org management.
 - Added .mp3 support in audio files.
 - DID/LineUri (without the +) should automatically populate the Exchange UM Extension.
 - MicroSoft domain adding in Federation domain setting is restricted.
 - Beta label removed from SFB Call reports.
- **CSP\Office365**
 - Clear completed jobs in Group job interfaces
 - Added CSP example in API Test App.
 - CSP billing settings under separate tab under Billing Settings added.
 - Added "Manage tenant using panel" in CSP plan to enable/disable tenant management using panel.
 - Send Authorization link to CSP tenant admin in CSP management for Provider to invite existing Tenants

5. Resolved\Issues Fixed

- **General (Active Directory, Billing, API, ADSync)**
 - Error in adding active directory user from CCC
 - Automatic Payments were not getting processed
 - Search filter div is popping out of main div
 - Allow to create Customers in MachPanel via WHMCS without creating any OU / Exchange or other Subscription.
