Integration of PayStack in MachPanel

1. Provider: Shows the name of provider you are configuring. Not editable.
 2. Enabled: Select NO only if you want to disable the payment gateway. This will prevent system from charging bills through this gateway.
 3. Enable Test mode: Enable the option for testing mode.
 4. Secret key: Provide the Secret key.
 5. Public key: Provide the Public key for configuration.
 6. Text to show if selected: Type necessary text.
- Customer will login into their panel and go to **Pay Bills** interface. By clicking on **Make payment** button customer will be redirected to PayStack interfaces:

- Customer will be automatically redirected back to **Pay bills** interface of MachPanel after interaction with payment gateway.

Adding Payment Group

- After Configuring PayStack, you have to Integrate it in Payment Groups from the following path: Home » System Configuration » Billing Configuration » Payment Groups

Integration of PayStack in MachPanel

- Click Save button
