

## Domain Verification

### Summary

This article describes in detail about the Steps for **Domain Verification**.

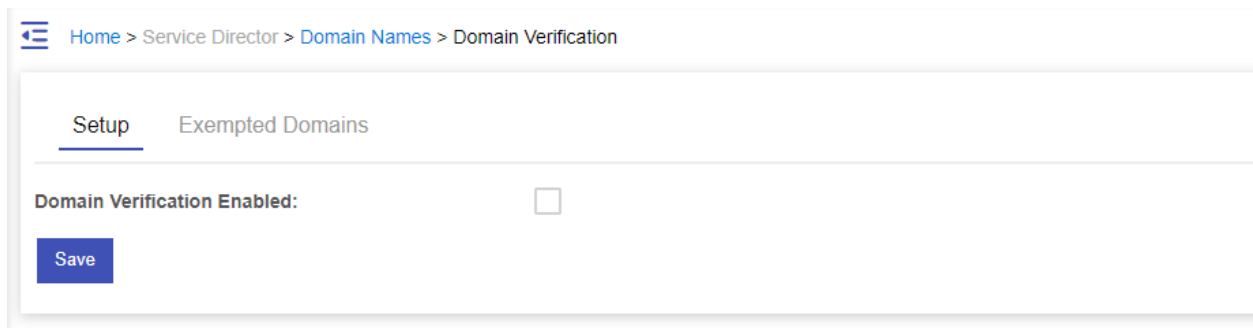

- Auto-remove unverified domain option is available now.  
i.e. it will remove the non-verified domains automatically when the time reaches as mentioned say 7 days etc.
- Existing domains can also be skipped from verification by using the provided option.
- If disabled, Domain Verification would not be considered in panel.

### Applies To

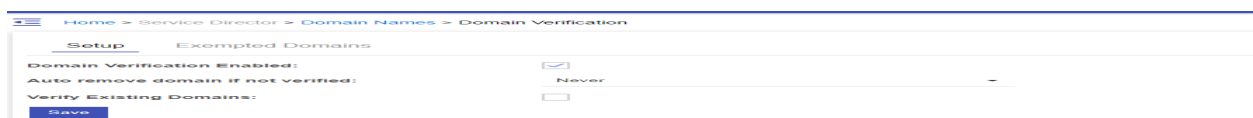

This article applies to MachPanel v6 and above.

### STEPS:

- Navigate **Home > Service Director > Domain Names > Domain Verification**

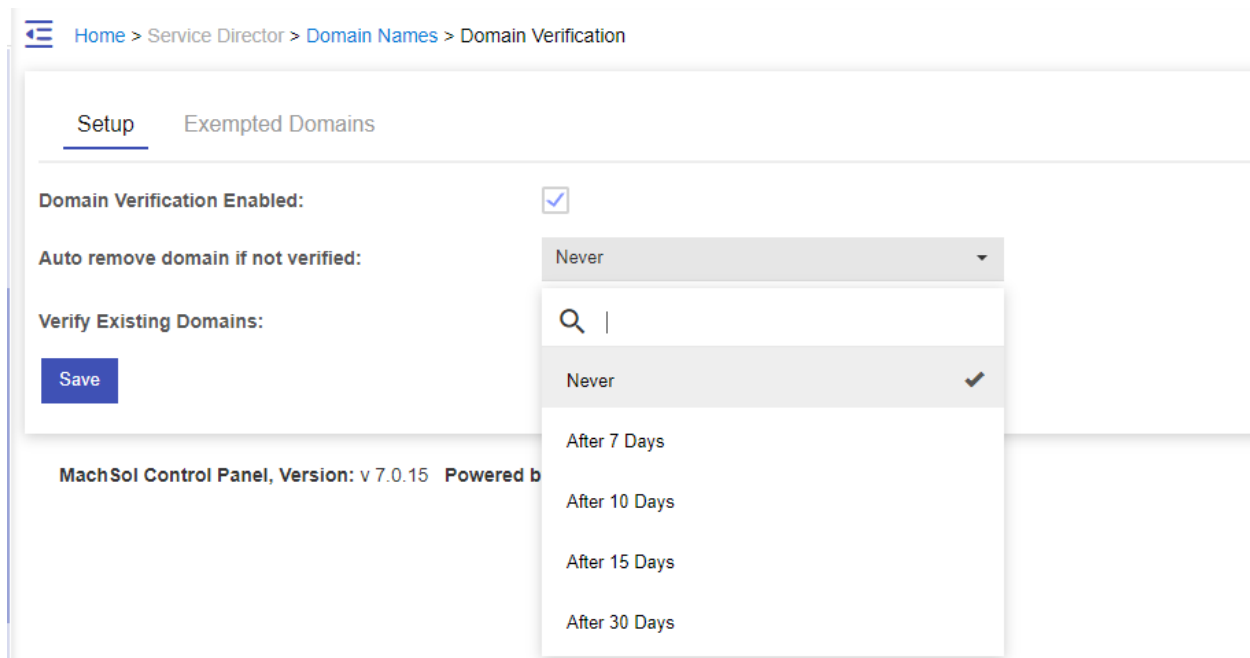

- You can **Enable Domain Verification** (As shown in screenshot below).

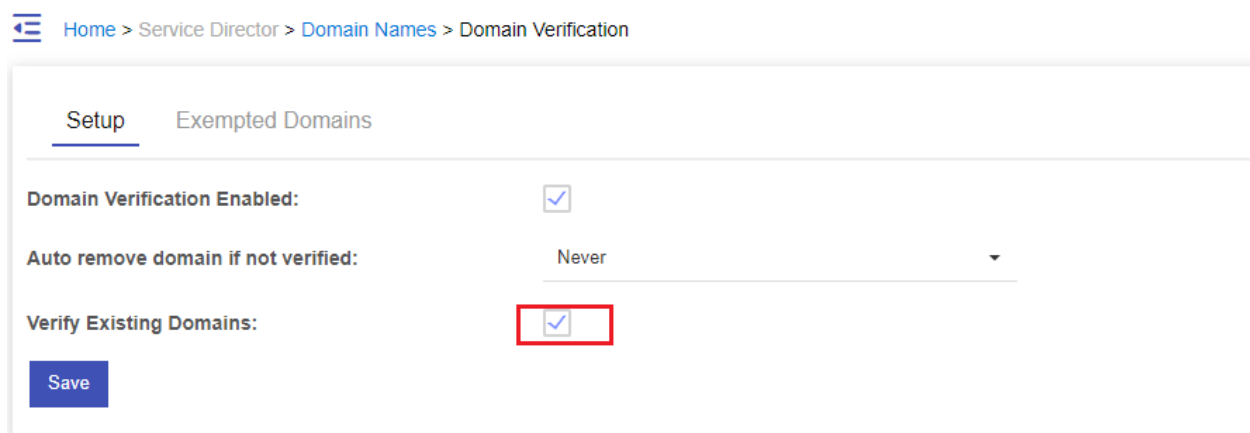

## Domain Verification

- You can also select when to **Auto Remove domain if not verified**

The screenshot shows the 'Domain Verification' setup page in the MachSol Control Panel. The breadcrumb trail is 'Home > Service Director > Domain Names > Domain Verification'. The 'Setup' tab is active. The 'Domain Verification Enabled' checkbox is checked. The 'Auto remove domain if not verified' dropdown menu is open, showing options: 'Never' (selected with a checkmark), 'After 7 Days', 'After 10 Days', 'After 15 Days', and 'After 30 Days'. The 'Verify Existing Domains' checkbox is not checked. A 'Save' button is at the bottom left. A footer note reads 'MachSol Control Panel, Version: v 7.0.15 Powered by'.

- You can check **Verify Existing Domains**

This screenshot shows the same 'Domain Verification' setup page, but with the 'Verify Existing Domains' checkbox checked and highlighted by a red rectangle. The 'Auto remove domain if not verified' dropdown is now closed and shows 'Never'. All other settings remain the same as in the previous screenshot.

**Note:** If Domain Verification is enabled and existing domains are not added for verification, all the existing domains are considered as verified. After that, if “Verify Existing Domains” is selected and settings are updated, it will not add the existing domains for verification

## Domain Verification

- In Tab, **Pending Verification**
  - Domains that are still pending for verification are listed here

The screenshot shows the 'Domain Verification' page with the 'Pending Verification' tab selected. The page includes a breadcrumb trail, a 'Set as Home Page' button, and a note about adding a TXT record. Below the note is a search bar and a table of domains pending verification.

Home > Service Director > Domain Names > Domain Verification Set as Home Page

Setup **Pending Verification** Verified Exempted Domains

Note: Please add a txt record in domain DNS to be verified, txt record value must match as shown against Domain Name. Record is auto verified in 5 minutes interval.

## Domain Verification

- **Remove and Cancel Subscription:** Clicking this will remove the selected Domain(s) and the corresponding subscription can be cancelled

The screenshot shows the 'Domain Verification' page with the 'Pending Verification' tab selected. The breadcrumb trail is 'Home > Service Director > Domain Names > Domain Verification'. A 'Set as Home Page' button is in the top right. Below the tabs, a note states: 'Note: Please add a txt record in domain DNS to be verified, txt record value must match as shown against Domain Name. Record is auto verified in 5 minutes interval.' A search bar is present. The 'Operations' section contains buttons: 'Mark as Verified', 'Add to Exempted', 'Remove', and 'Remove and Cancel Subscription' (highlighted with a red box). Below is a table with columns: Domain Name, Customer, Txt Record, Date added, Updated on, and Option.

<input type="checkbox"/>	Domain Name	Customer	Txt Record	Date added	Updated on	Option
<input type="checkbox"/>	example.com			24.01.2022	24.01.2022	<a href="#">Run</a>
<input type="checkbox"/>	example.com			01.11.2021	15.03.2022	<a href="#">Run</a>
<input type="checkbox"/>	example.com			01.12.2021	01.12.2021	<a href="#">Run</a>

**Note:** User/mailbox can't be created using the domain which is not verified yet

- In Tab, **Verified**, Domains that are verified listed here
- **Marked as Un-Verified:** Clicking this will mark the selected Domain(s) as un-verified for re-verification purpose

The screenshot shows the 'Domain Verification' page with the 'Verified' tab selected. The breadcrumb trail is 'Home > Service Director > Domain Names > Domain Verification'. A 'Set as Home Page' button is in the top right. Below the tabs, a search bar is present. The 'Operations' section contains buttons: 'Mark as Un-Verified' (highlighted with a red box) and 'Add to Exempted'.

- **Add to Exempted:** Clicking this will move the selected Domain(s) to exempted domain list if no more in use

## Domain Verification

The screenshot shows the 'Domain Verification' page in a web application. At the top, there is a breadcrumb trail: 'Home > Service Director > Domain Names > Domain Verification'. To the right of the breadcrumb is a button labeled 'Set as Home Page'. Below the breadcrumb, there are four tabs: 'Setup', 'Pending Verification', 'Verified', and 'Exempted Domains'. The 'Verified' tab is currently selected and highlighted with a red box. Below the tabs is a search bar with the placeholder text 'Search' and a plus icon on the right. Under the search bar, there is a section titled 'Operations' containing two buttons: 'Mark as Un-Verified' and 'Add to Exempted'. The 'Add to Exempted' button is highlighted with a red box.

- You can also provide **Exempted Domains** (Free from an obligation or liability to which others are subject)
  - Exempted domains are listed here
  - Domain(s) can be updated and removed from the exempted list

The screenshot shows the 'Exempted Domains' page in a web application. At the top, there is a breadcrumb trail: 'Home > Service Director > Domain Names > Domain Verification'. To the right of the breadcrumb is a button labeled 'Set as Home Page'. Below the breadcrumb, there are two tabs: 'Setup' and 'Exempted Domains'. The 'Exempted Domains' tab is currently selected and highlighted with a blue underline. Below the tabs is a section titled 'Add Exempted Domain'. Inside this section, there is a label '\*Domain Name' followed by a text input field. Below the input field is a button labeled 'Save'.
