3. Resolved/Fixed Issues

1. Important Prerequisites

Please follow the steps given below in sequence and execute instructions in the KB articles to complete the update:

1. [Update to Latest MachPanel](#)
2. [Update to Latest MachPanel Remote Server](#)

2. Improvements / New Features

- **General (MachPanel, AD, ADSync, Billing, Store, WHMCS):**
 - New Feature: Safer Pay integration added
 - Enhancement: Calendar Permission logging added
 - Enhancement: Staff role permissions added to allow access to Domain verification section
 - Enhancement: Security groups can be selected as members of security group
 - New Feature: Add Custom title on Dashboard
 - Enhancement: Payment Summary in Invoice was showing total of Multiple Payments and Transaction ID of latest one. Loaded default

template and customized again

- **Enhancement:** Generated alert email to provider/reseller if Authorize.Net marks a payment for review, so that an employee can review backend and update payment status correctly
- **Enhancement:** Two Factor Authentication Settings updated, allowed multiple options to be used, allowed reseller to customize option to use. Customer/reseller/end user can select method to use from available methods
- **Enhancement:** Re-arranged Columns in listing For Exchange, Office 365/CSP, Skype for business, SharePoint, CRM, VPS/Hyper-V, WebHosting/Hostmatic, Work Folders and RDS
- **Exchange:**
 - **Enhancement:** Quota management of non-mail enabled public folders added
 - **Enhancement:** Updated Manager and Permissions handling for DL and Mailbox members available for operation
 - **Enhancement:** Separate job for Sync Mailbox Permissions in Database added
 - **Enhancement:** Cancel **Add Mailbox Job** added in Group Jobs listing
 - **Enhancement:** Mailbox quota assignment in **Advanced** tab using available sizes selection added
 - **Enhancement:** Password option "user must change password on next logon" add as available already in AD user Add/Edit
 - **Enhancement:** Functionality to Schedule SPLA report by Customer
- **Office 365/CSP:**
 - **Enhancement:** Tenant management using 2FA enabled admin login credentials support added

MachPanel Build v6.4.50 Release Notes

- **Enhancement:** Ability for Reseller to add and adjust Phone Number under Teams added
 - **Enhancement:** UPN update in Teams management is handled
 - **Enhancement:** Sync License job is added to update database when a license is added/removed
 - **Enhancement:** Create a Teams Team from a Group
 - **Enhancement:** DirectRouting users Firstname and Lastename value set on creation
-
- **VPS/Hyper-v:**
 - **Enhancement:** VPS management- Access permissions are reviewed, estimate section will be hidden if billing is off

3. Resolved / Fixed Issues

- **General (Machpanel, Billing, Ad, Adsync):**
 - **Fixed:** Error in Login using Duo Security
 - **Fixed:** Link added on customer menu was appearing at Provider and Reseller's menu as well
 - **Fixed:** Sub-reseller Permissions/delegation reviewed i.e. can not see customers of others
 - **Fixed:** Hidden modules were being shown on CCC
 - **Fixed:** Password recovery (Forgot Password) was not working
 - **Fixed:** Error while updating End customer's contact due to disabled MailChimp.
 - **Fixed:** Slow loading of pages caused by Provide Support JS file load
 - **Fixed:** Error related to Edge and Hub role in Apply Smart Host
 - **Fixed:** Payment Summary in Invoice was showing total of Multiple Payments and Transaction ID of latest one.

Note: Have to Load default invoice template and customize again.

- **Exchange:**

- Fixed: Template was not being assigned while enabling mailboxes services on existing AD users
- Fixed: Operation section was getting hidden if sync from backend permission was not granted
- Fixed: Mailbox setup email was not being sent
- Fixed: Error of ExServerGroup when editing ADUser and Exchange not in use
- Fixed: Update DB error in mailbox template clone function
- Fixed: Exchange mailbox export PST job cancel issue
- Fixed: PST Export- reseller access template permission was not updating
- Fixed: The bulk Export function was not checking if Mailbox is provisioning, it will give error message instead of adding a job
- Fixed: Security and Dynamic Groups were not being shown in DL and mailbox permissions

- **Office 365/CSP:**

- Fixed: Teams-User Edit **DDL selected value not found** error
- Fixed: Teams-False alarm **resource not available** error
- Fixed: **mail** attribute was getting set with alternative email address

- **VPS/Hyper-V:**

- Fixed: In VPS import, OS record in database is corrected
