Content

1.
    Important Prerequisites/Upgrade Instructions

2.
    Improvements/New Features

3.
    Resolved/Fixed Issues

1. Important Prerequisites

Please follow the steps given below in sequence and execute instructions in the KB articles to complete the update:

1.
    [Update to Latest MachPanel](#)

2.
    [Update to Latest MachPanel Remote Server](#)

2. Important Note

1. .Net Framework 4.6.2 is required to be installed on control server
2. The clients who are using O365 module must do following:
    - If you have installed any SkypeOnlineConnector module, Uninstall it from Add/Remove Programs in Windows Control Panel.
    - If you have installed any MicrosoftTeams Module, Uninstall it using PowerShell command:
        o **Uninstall-Module MicrosoftTeams -Force**
    - Install 2.3.2-preview version of Teams Module:
      https://www.powershellgallery.com/packages/MicrosoftTeams/2.3.2-preview
        o Install-Module -Name MicrosoftTeams -RequiredVersion 2.3.2-preview -AllowPrerelease
        o If above command gives error related to command parameters RequiredVersion, AllowPrerelease, run below commands on shell:
            - Install-PackageProvider Nuget -Force
            - Install-Module -Name PowerShellGet -Force
            - Install-Module -Name MicrosoftTeams -RequiredVersion 2.3.2-preview -AllowPrerelease
