

MachPanel Build v6.5.25 Release Notes (December 2, 2021)

Content

1. Important Prerequisites/Upgrade Instructions
2. Important Note
3. Improvements/New Features
4. Resolved/Fixed Issues

1. Important Prerequisites

Please follow the steps given below in sequence and execute instructions in the KB articles to complete the update:

1. [Update to Latest MachPanel](#)
2. [Update to Latest MachPanel Remote Server](#)

2. Important Note:

The clients who are using Microsoft CSP, Direct Routing and Teams management, they have to uninstall all Microsoft Teams module and install the latest using PS command:

For uninstall:

```
UnInstall-Module MicrosoftTeams
```

For install:

```
Install-Module -Name MicrosoftTeams -Allow
```

Note: The recommended version for Microsoft Teams is v3.0.0

3. Improvements / New Features

- **General (MachPanel, AD, ADSync, Billing, Store, WHMCS):**

MachPanel Build v6.5.25 Release Notes (December 2, 2021)

- o Added functionality to handle MachPanel Provisioning Service memory usage
- o Added functionality to handle billing for one time Misc Products
- o Added a constant message on Edit Staff Role/Permission interface
- o Added functionality to show Tickets Tab on Edit Customer interface
- o Permission added in Reseller's Access Template to hide/unhide menus
- o Added functionality to remove duplicate records on Sync from Backend
- o Added functionality to Export/Import Customers using Excel file
- o Added functionality to show Built-in Staff Roles in Read Only mode to users
- o Added functionality to Clone and Edit Built-in Staff Roles
- o Functionality has been added to allow Provider to change Staff User's Role in Edit Staff User interface
