

How to add Application Impersonation?

Summary

This article provides a summary on how to add application impersonation for Exchange accounts in MachPanel.

Applies To

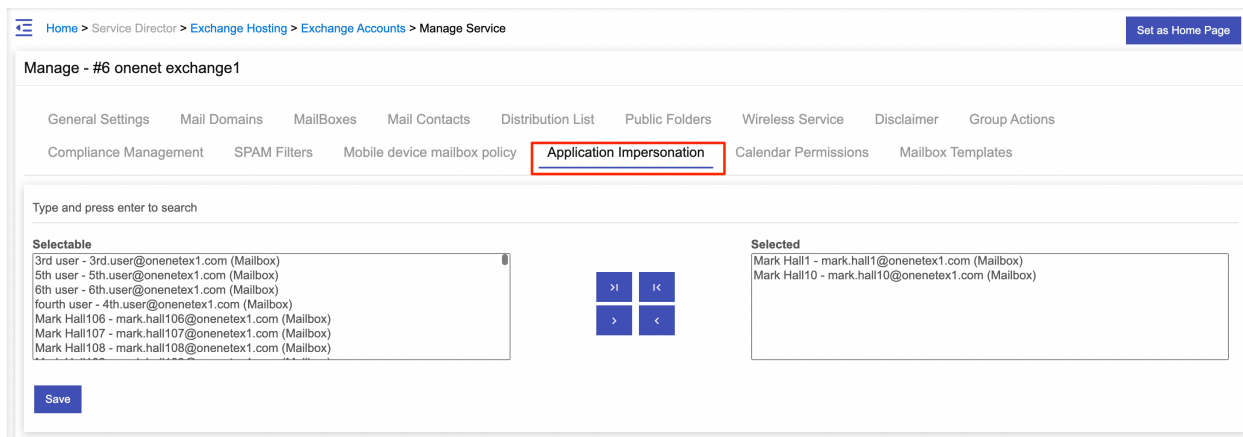

This article applies to MachPanel all versions.

Application Impersonation:

For Exchange 2010 and later server versions, You can add Mailbox to Application Impersonation under tab “Application Impersonation” in Exchange Organization management by clicking on **Manage** from the following path: **Home >> Service Director >> Exchange Hosting >> Exchange Accounts**.

Select **Application Impersonation** tab.

Selectable/Selected List with searching option of active User, Linked Mailboxes and Mail-Enabled Security Groups.

Allow Customers to Enable/Disable Application Impersonation:

- To allow/disallow "**Application impersonation**" for Customers/Resellers you can check/uncheck "**Application Management allowed**" option under

How to add Application Impersonation?

"Exchange Service Plans". Also implemented its "**Access Template**" permission.

- To create a hosted email plan navigate to following path: **Home » Service Plans » Exchange**
- Under **Resources** tab and check option **Application impersonation management allowed:**

Note: You can also edit existing hosted email plans by clicking on **Edit** link. and **Sync sold plan resources**. If this Sync sold plan resources checkbox is checked, product name, comments, plan resources will be updated in sold subscription resources. Changing plan resources does not auto update entities like Mailbox settings.
