Add Users in CSP/O365/NCE

Now, You can add email alias as "First name initial.Last name (j.smith)" as shown below

A screenshot of the 'Add Email Alias' form in MachPanel. The form is divided into two main sections: 'General Information' on the left and 'Add Email Alias' on the right. The 'Add Email Alias' section contains the following fields and options:

- E-mail address local part:** A list of radio button options:
 - Primary SMTP e-mail local part
 - First name.last name (john.smith)
 - First name initial and last name (j.smith)
 - First name and last name initial (johns)
 - First name initial.last name (j.smith) (highlighted with a red box)
 - Last name.first name (smith.john)
 - Last name initial and first name (sjohn)
 - Last name and first name initial (smithj)
- Set as User Principal Name:** A checkbox that is currently unchecked.
- Select Domain:** A dropdown menu with 'Nothing selected' as the current value.
- Save:** A green button at the bottom left of the form.

Important Note: If you get following error on adding User : **Error in syncing SfB user. Details: Error in fetching SfB user from Office 365. Details: Error Processing command: The remote name could not be resolved.**
