

MachPanel Build v7.2.20 Release Notes (August 8, 2023)

Content

1. Important Prerequisites/Upgrade Instructions
2. Important Note
3. Improvements/New Features
4. Resolved/Fix Issues

1. Important Prerequisites

Please follow the steps given below in sequence and execute instructions in the KB articles to complete the update:

1. [Update to Latest MachPanel Control Server](#)
2. [Update to Latest MachPanel Remote Server](#)

Also, there are some SQL commands/scripts used since build 7.2.11 which are supported in SQL 2012 or later. So, it is recommended that you install SQL version 2017 or 2019 using below KB article

- Installation guide for SQL 2017
 - <https://kb.machsol.com/Knowledgebase/53483/Installation-Guide-for-SQL-2017-Express>
- Installation guide for SQL 2019
 - <https://kb.machsol.com/Knowledgebase/55737/Installation-Guide-for-SQL-Server-2019>

Once done, you have to move your MachPanel DB from old SQL instance to the newly installed SQL. For that you can follow below KB article

- [How to Move MachPanel MS SQL Database To Another New MS SQL Server \(machsol.com\)](#)

2. Important Note

If you are using **MachPanel Rest API**, please follow link below to update to latest version of Rest API:

-

[Update to Latest MachPanel REST API](#)

- Fixed Issue: CentOS IP config not getting provisioned during VM create.
- Fixed Issue: Invalid IP Address error when IP/Subnet is sent to server.
- Fixed Issue: Error in VM management due to memory management not allowed.
- Fixed Issue: Hyper-v Windows 2022 Sealed Image Error

5. Known Issues

1. If you face below issue in "Sync data from backend" or some other operation where result of **MAPIHTTPEnabled** attribute is returned as "Null" / "Blank".

**Error getting recipient details from Exchange Server: Error getting Mailboxes information: Object reference not set to an instance of an object.
IP=xxx.xxx.xxx.xxx**

Solution:

For some mailboxes MAPIHTTPEnabled value is Blank/Null, this causes error in "Sync data from Backend" and CASMailbox settings manipulation. Please run below script on Exchange PowerShell to set default value to True or False:

Code / PowerShell Script:

Get-CASMailbox -resultsizes unlimited | Where {\$_.MAPIHTTPEnabled -eq \$null} | Set-CASMailbox -MAPIHTTPEnabled \$true

It may take time depending on number of mailboxes with Null value.

Once this is done, repeat / re-run the operation from panel that was previously failing.

MachPanel Build v7.2.20 Release Notes (August 8, 2023)

2. Problem in connecting to Outlook for MAPI Enabled, please review below KB and make changes as per requirement:

<https://kb.machsol.com/Knowledgebase/55746/Added-Setting-of-MAPIhttpEnabled-in-mailbox-features>
